Company Overview

East Greenfields has been engaging with photovoltaic (solar) generation equipment importation, retail trading, system engineering and construction since 2012. The company also started in 2012 to offer the micro roof top solar generation system with a minimum capacity of 500 watts-peak.

The company has established international procurement relationship with a leading photovoltaic manufacturer which in 2013 and 2014 has become the number one manufacturer with the highest number of units delivered worldwide. East Greenfields also maintains international procurement methods and process with several US based procurement networks.

Retail trading activities of the company has already reached national scale. The company has established sales network that has already distributed solar panel and accessory retail sales to Nueva Viscaya, Albay, San Pedro Laguna, Quezon Province, Metro Manila, Cavite, Cebu city, Leyte and Tagum (Mindanao).
