Company Overview

Enercon Systems International Philippines Corporation is a complete system solution provider for customized genset controls. The company was established in April 18, 2013.

Enercon products are backed up by the industry's finest and most responsive service support system. Their product is the heart of any power generation systems, thus, we ensure to our clients the performance and reliability of our control systems by integrating components that comes from most reputable suppliers.

As a system solution provider, we are looking forward for other opportunities in the market on bigger scale for both local and international to share our capabilities and to meet the continuous demands by providing high quality and better products.
