Faction Emblems of the Early ISC Planets

Veltressai Commonwealth

The symbol evokes a rising sun; the four squares reflect the four continents of the Veltressai homeworld and the importance of the Quads.

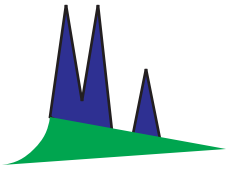

Q'naabian Enclave

The symbol evokes a star being pulled into a black hole. They could see such a spectacle from their planet, inspiring them to explore space.

Rovillian Colonies

The symbol evokes their ocean world and their red star. The rings around the star represent the telekinesis they used to rise above the waters.

Pronhoulite Republic

The symbol evokes their monumental architecture rising above a verdant hillside. It also reflects striving to reach space and achievement.

Korlivilar Protectorate

The symbol evokes an early rocket ship striving to reach space after initial difficulties. It reflects their drive to explore the cosmos, whatever the cost.
