1) Student Living

Studies prove that having suitable housing correlates to good academic results. I've helped push through a housing officer at the latest HUSU council to ensure that students are represented but this needs to be taken further. I want to introduce an accredited accommodation scheme for students residing off-campus. Additionally, I want to push for a greater range of options available for all students such as those with families.

2) Safety & Wellbeing

My priority is to lobby the university and students' union to provide better support for individuals involved in any university investigations regarding grievances, which can affect all students, regardless of their gender identity. These grievances can vary from bullying, physical violence, sexual assault, society grievances amongst others. Student safety can also be improved through the introduction of a student card tap in system to Asylum. Finally, I will advocate for access to self-testing STI Kits, beyond SHAG week.

3) Student Experience

I want to introduce life skills workshops during the induction week and throughout the academic year. These are skills that many of us need to develop for post-academic study. It provides the opportunity to improve the transition into independent living. I also wish to improve the visibility of employment and volunteering opportunities for students.
