

Whether you're applying a sheer color strip to your French manicure, adding Clear As Day as an extra layer of protection and shine over your favorite shade, or adding pizzazz to a solid color with transparent nail art, keep these tips in mind to get a perfect mani when working with overlay strips!

DO

- DO carefully line up your overlay strip at your cuticle before applying.
- DO wait for your strips to fully set before applying the overlay strips.
- DO make sure to apply overlay strips to nail color or art that is smooth and free of visible bumps or creases.

DON'T

- DON'T attempt to re-position overlay strips after they have been smoothed down and set.
- DON'T apply overlay strips on nails that are oily, wet, or have any residue on them.
- DON'T excessively touch your overlay strips on the sticky side; doing so can add visible fibers and fingerprints.
