FOREWORD

In fulfilment of its statutory obligations under the Electricity Act, 2003, Central Electricity Authority publishes the statistics related to generation, transmission, trading, distribution and utilization of electricity by different sectors in the country on annual basis. The publication “**All India Electricity Statistics - General Review 2025**” is a step in this direction. The information contained in this publication would be useful in working out the various growth rates and consumption trends to facilitate future planning both at Central and State level. It also helps for assessment of the achievement of various sectors of electricity in the country.

The data for this publication has been collected from various organizations of the Indian Electricity Sector. The report contains a wealth of data, including Installed capacity, Electrical Energy Generation, Transmission and Distribution Network capacity, Captive Power Plants and Electricity Consumption etc. It contains data on various categories of Electricity Consumption like domestic, agriculture, industrial power, street lighting, water pumping schemes, traction etc., and also details about the number of consumers and the connected load.

As per the available data, the installed capacity including captive plants during the year 2023-24 has increased by 5.75 % over the previous year and the total electricity generated in the country including that from captive plants during the year 2023-24 has registered a growth of 7.02 % over the previous year. The share of renewable energy resources (Utilities and non-utilities) (excluding Hydro above 25MW) in total installed capacity has increased from 26.74% to 29.18% and the share of generation from these sources in total generation has increased from 11.60 % to 11.98 % in the country during the year 2023-24.

The cooperation of all utilities/ organizations who have furnished the requisite information, making this publication possible, is gratefully acknowledged. I hope that “All India Electricity Statistics - General Review 2025” will fulfill the expectations of all stakeholders who are involved in the development of electricity sector in India.

प्राक्कथन

विद्युत अधिनियम 2003 के प्रावधानों के अनुसार केंद्रीय विद्युत प्राधिकरण द्वारा पर देश के विभिन्न क्षेत्रों द्वारा विद्युत उत्पादन, पारेषण, ट्रेडिंग, वितरण और उपभोग संबंधी वार्षिक आधार पर आंकड़े सार्वजनिक किए जाते हैं। “अखिल भारतीय विद्युत सांख्यिकी - सामान्य पुनर्विलोकन 2025” का प्रकाशन इस दिशा में एक कदम है। इस प्रकाशन में शामिल सूचना, देश में विभिन्न विकास दरों और उपभोग रुझानों के आकलन में उपयोगी होगी, जिससे केंद्र और राज्य दोनों स्तरों पर भावी योजनायें बनाने में आसानी होगी। इससे देश में विद्युत के विभिन्न क्षेत्रों की उपलब्धियों का आकलन करने में भी मदद मिलती है।

“अखिल भारतीय विद्युत सांख्यिकी - सामान्य पुनर्विलोकन” के लिए आंकड़े भारतीय विद्युत क्षेत्र के विभिन्न संगठनों से संग्रहित किये गये हैं। इस रिपोर्ट में प्रचुर मात्रा में डेटा शामिल है, जिसमें स्थापित क्षमता, विद्युत ऊर्जा उत्पादन, ट्रांसमिशन और वितरण नेटवर्क क्षमता, कैप्टिव पावर प्लांट और बिजली की खपत आदि शामिल हैं। इसमें विद्युत उपभोग की भिन्न श्रेणियों जैसे घरेलू, कृषि, औद्योगिक विद्युत, स्ट्रीट लाईट, जल पंपिंग की योजनाएं, ट्रेक्शन इत्यादि संबंधी आंकड़े और उपभोक्ताओं की संख्या तथा संबद्ध लोड के ब्यौरे भी शामिल हैं।

उपलब्ध आंकड़ों के अनुसार, वर्ष 2023-24 के दौरान विद्युत उत्पादन क्षमता पिछले वर्ष की तुलना में 5.75% बढ़ी हैं और इस वर्ष कुल विद्युत ऊर्जा उत्पादन, जिसमें कैप्टिव प्लांट भी शामिल हैं, पिछले वर्ष की तुलना में 7.02 % बढ़ा हैं। वर्ष 2023-24 के दौरान, देश में कुल स्थापित विद्युत उत्पादन क्षमता में, अक्षय ऊर्जा स्रोतों (यूटिलिटी और गैर यूटिलिटी) (25 मेगावाट से अधिक जल विद्युत को छोड़कर) की स्थापित क्षमता की हिस्सेदारी 26.74% से बढ़कर 29.18 % रही और इन स्रोतों से उत्पादन की हिस्सेदारी, कुल विद्युत उत्पादन में 11.60 % से बढ़कर 11.98 % रही हैं।

मैं उन सभी यूटिलिटियों /संगठनों के सहयोग के लिए, उनके प्रति आभार प्रकट करता हूँ, जिन्होंने समय पर अपेक्षित सूचना प्रस्तुत करके इस प्रकाशन को सम्भव बनाया। मुझे आशा है कि “अखिल भारतीय विद्युत सांख्यिकी सामान्य पुनर्विलोकन 2025” भारत के, विद्युत क्षेत्र के विकास में शामिल सभी हितधारकों की अपेक्षाओं को पूरी करेगा।

Central Electricity Authority

PREFACE

Collection, analysis and compilation of annual All India Electricity Statistics has been an important task being accomplished by Central Electricity Authority (CEA) in fulfillment of its obligation under the Electricity Act, 2003. The “All India Electricity Statistics-General Review 2025” incorporates important statistics/ data on installed capacity, electric energy generation and utilization of electric energy along with the transmission and distribution losses, per capita consumption. This publication also contain energy utilization by various categories of electricity consumers like domestic, commercial, irrigation, industries (LV /MV, HV /EHV), public lighting, public water works, etc. Data pertaining to utility sources and Captive Power Plants in Industries having demand of 0.5 MW and above have also been included in the Report. The State wise/ Sector wise/ Category wise/ Mode wise data is compiled in the form of Tables, Charts/Graphs and write-up to convey the information in a clear manner to all its users.

The non-availability of complete data/information in respect of certain utilities for the FY 2023-24 is a major constraint and so I request the Power Utilities to provide the requisite input data on priority and in timely manner so that “All India Electricity Statistics-General Review” could be finalized in time.

The “All India Electricity Statistics- General Review 2025” containing data for FY 2023-24 has been compiled based on the data/information received from Power Utilities and Captive Power Plants. I am sure that the information contained in the publication shall be of immense value to all those associated with Power Sector of India for the planning of their activities. The comments/observations/ suggestions for improvement of this publication would be welcome and the same would be taken care of in our next issue of the report “All India Electricity Statistics-General Review”.

प्रस्तावना

वार्षिक अखिल भारतीय विद्युत सांख्यिकी का संग्रह, विश्लेषण और संकलन विद्युत अधिनियम, 2003 के तहत अपने दायित्व को पूरा करने में केंद्रीय विद्युत प्राधिकरण (सीईए) द्वारा पूरा किया जाने वाला एक महत्वपूर्ण कार्य है। "अखिल भारतीय विद्युत सांख्यिकी-सामान्य पुनर्विलोकन 2025" में स्थापित क्षमता, विद्युत ऊर्जा उत्पादन और विद्युत ऊर्जा के उपयोग के साथ-साथ पारेषण और वितरण हानि, प्रति व्यक्ति खपत पर महत्वपूर्ण आंकड़े/डेटा शामिल हैं। इस प्रकाशन में घरेलू, वाणिज्यिक, सिंचाई, उद्योग (एलवी/एमवी, एचवी/ईएचवी), ट्रेक्शन, सार्वजनिक प्रकाश व्यवस्था, सार्वजनिक जल कार्य आदि जैसे बिजली उपभोक्ताओं की विभिन्न श्रेणियों द्वारा ऊर्जा उपयोग भी शामिल है। इस रिपोर्ट में 0.5 मेगावाट और उससे अधिक की मांग वाले उद्योगों में उपयोगिता स्रोतों और कैप्टिव पावर प्लांट से संबंधित डेटा को भी रिपोर्ट में शामिल किया गया है। राज्यवार/क्षेत्रवार/श्रेणीवार/मोडवार डेटा को अपने सभी उपयोगकर्ताओं तक स्पष्ट तरीके से जानकारी पहुंचाने के लिए तालिकाओं, चार्ट/ग्राफ और राइट-अप के रूप में संकलित किया जाता है।

वित्त वर्ष 2023-24 के लिए कुछ उपयोगिताओं के संबंध में पूर्ण डेटा/जानकारी की अनुपलब्धता एक बड़ी बाधा है और इसलिए मैं पावर यूटिलिटीज से अनुरोध करता हूं कि वे प्राथमिकता पर और समय पर अपेक्षित इनपुट डेटा प्रदान करें ताकि "अखिल भारतीय विद्युत सांख्यिकी-सामान्य पुनर्विलोकन" को समय पर अंतिम रूप दिया जा सके।

वित्त वर्ष 2023-24 के डेटा वाले "अखिल भारतीय विद्युत सांख्यिकी-सामान्य पुनर्विलोकन-2025" को पावर यूटिलिटीज और कैप्टिव पावर प्लांट्स से प्राप्त डेटा/जानकारी के आधार पर संकलित किया गया है। मुझे विश्वास है कि प्रकाशन में शामिल जानकारी भारत के विद्युत क्षेत्र से जुड़े सभी लोगों के लिए अपनी गतिविधियों की योजना बनाने के लिए अत्यधिक मूल्यवान होगी। इस प्रकाशन में सुधार के लिए टिप्पणियों/ प्रेक्षणों/ सुझावों का स्वागत है और अखिल भारतीय सांख्यिकी-सामान्य पुनर्विलोकन के अगले अंक में इन सुझावों को ध्यान में रखा जाएगा।

ACKNOWLEDGEMENT

This publication "All India Electricity Statistics- General Review 2025" contains countrywide sectoral and category-wise statistics relating to generation, transmission, distribution and consumption of electricity in the country. The All India Electricity Statistics is published by CEA on annual basis in fulfillment of its obligation under the Electricity Act, 2003. The data for this publication are collected from various Power Utilities in public and private sector, Electricity Departments and Non-Utilities of India under specific consumer categories. With large number of organizations, the work of data collection, validation and analysis is a time taking activity but done in CEA in an efficient manner.

I would like to thank the officers of PDM&LF Division have put their sincere efforts in compilation/preparation of this publication through constant follow-up with Power Utilities for data collection. The contribution made by Ms. Kiran Meena, Director; Shri Gourav Jausja, Deputy Director; Shri Pooran Chand, Deputy Director; Shri Laxmi Narayan, Assistant Director and Shri Keshav Singh, Assistant Director is gratefully acknowledged. Shri Dhananjay Kumar, Sr. Statistical Officer provided administrative support in bringing out this publication.

This compilation has been possible due to active co-operation of all central, state and private sector Power utilities/Organizations, who have furnished the requisite information in timely manner. All efforts have been made to incorporate the data on electricity sector and maintain accuracy through various analytical checks and data validation by our teams. However, any discrepancy, may be brought to our notice which will be gratefully acknowledged and taken care of in the next issue of "All India Electricity Statistics-General Review".

आभार

"अखिल भारतीय विद्युत सांख्यिकी सामान्य पुनर्विलोकन-2025" के इस प्रकाशन में विभिन्न क्षेत्रों/श्रेणियों द्वारा विद्युत के उत्पादन, पारेषण, संवितरण और खपत से संबंधित देशव्यापी आंकड़े अंतर्निहित हैं। भारतीय विद्युत क्षेत्र के वार्षिक आंकड़े सीईए द्वारा विद्युत अधिनियम, 2003 के तहत अपने दायित्व को पूरा करने में महत्वपूर्ण कार्य रहा है। इस प्रकाशन के लिए आंकड़े सरकारी और निजी दोनों क्षेत्रों में विद्युत क्षेत्र की यूटिलिटीयों, विद्युत विभाग और भारत की गैर-यूटिलिटीयों और विशिष्ट श्रेणी के उपभोक्ताओं से एकत्रित किए गए हैं। विश्वसनीय आंकड़ों की उपलब्धता विद्युत के विभिन्न क्षेत्रों में निर्णय करने को सुगम बनाने के लिए विभिन्न संकेतकों को तैयार करने के लिए एक महत्वपूर्ण इनपुट है। संगठनों की बड़ी संख्या के कारण आंकड़ा संग्रहण का कार्य निश्चय ही बहुत जटिल हो गया है।

पीडीएम&एलएफ प्रभाग के अधिकारियों ने डेटा संग्रह के लिए निरंतर अनुवर्ती कार्रवाई के माध्यम से इस प्रकाशन के संकलन में अपने ईमानदार प्रयास किए हैं। श्रीमती किरण मीणा, निदेशक; श्री गौरव जसूजा, उप निदेशक; श्री पूरण चन्द, उप निदेशक; श्री लक्ष्मी नारायण, सहायक निदेशक एवं श्री केशव सिंह, सहायक निदेशक द्वारा दिए गए योगदान के लिए मैं उनका आभार प्रकट करता हूँ। इस प्रकाशन को जारी किए जाने में श्री धनंजय कुमार, वरिष्ठ सांख्यिकी अधिकारी ने प्रशासनिक सहयोग किया है।

यह संकलन सभी केंद्रीय, राज्य और निजी क्षेत्र की विद्युत उपयोगिताओं/संगठनों के सक्रिय सहयोग के कारण संभव हुआ है, जिन्होंने अपेक्षित जानकारी प्रदान की है। विद्युत क्षेत्र के डेटा को शामिल करने और सटीकता बनाए रखने के लिए सभी प्रयास किए गए हैं। यदि इस सामान्य पुनर्विलोकन में कोई विसंगति देखी जाती है, तो उसे हमारे ध्यान में लाया जा सकता है, जिसे विद्युत सांख्यिकी-सामान्य पुनर्विलोकन के अगले अंक में कृतज्ञतापूर्वक स्वीकार किया जाएगा और उस पर ध्यान दिया जाएगा।

GLOSSARY	
(Containing Definitions, Expansion of Abbreviations)	
A & W	As & When
APPGCL	Andhra Pradesh Power Generation Corporation Limited
APTRANSCO	Transmission Corporation of Andhra Pradesh Limited
BBMB	Bhakra Beas Management Board
CCGT	Combine Cycle Gas Turbine
Ckt.Kms.	Circuit kilometers
CSP	Central Sector Project
Deptt.	Department
DVC	Damodar Valley Corporation
E	Estimated
ER	Eastern Region
GRIDCO	Grid Corporation of Orissa Limited
GWh	Giga Watt Hour (equivalent to 1 Million Unit (MU) of Electrical Energy)
HPGCL	Haryana Power Generation Corporation Limited
HV	High Voltage
HVPNL	Haryana Vidyut Prasaran Nigam Limited
IPGCL	Indra Prastha Generation Corporation Limited
KL	Kilo Litre
KPTCL	Karnataka Power Transmission Corporation Limited
kV	Kilo Volt
kVA	Kilo Volt Ampere
kW	Kilo Watt
kWh	Kilo Watt Hour
LSHS	Low Sulphur Heavy Stock
LV	Low Voltage
MMSM	Million Metric Standard Cubic Metre
MPPGCL	Madhya Pradesh Power Generation Corporation Limited
MPPTCL	Madhya Pradesh Power Transmission Corporation Limited
MT	Metric Tonne
MV	Medium Voltage
MVA	Mega Volt Ampere
MW	Mega Watt(equivalent to 1000 Kilo Watt)
NA	Not Available
NEEPCO	North Eastern Electric Power Corporation Limited
NER	North- Eastern Region
NHDC	Narmada Hydro Development Corporation Limited
NHPC	National Hydro Electric Power Corporation Limited
NON-UTILITIES	Non-Utilities shall mean captive generating plant which means a power plant set up by any person to generate electricity primarily for own use and includes power plant set up by any Co-Operative society or association of persons for generating electricity primarily for use of members of such Co-Operative society or association.
NPCIL	Nuclear Power Corporation of India Limited
NR	Northern Region
NTPC	National Thermal Power Corporation Limited
OH	Over Head
OHPL	Orissa Hydro Power Corporation Limited
OP	Off Peak
OPGCL	Orissa Power Generation Corporation Limited
OPTCL	Orissa Power Transmission Corporation Limited

P	Peak
PDC	Power Development Corporation
PPCL	Pragati Power Corporation Limited
PTCUL	Power Transmission Corporation of Uttarakhand Limited
R	Repeated
RES	Renewable Energy Sources (Includes Electric Generation due to (a) Wind (b) Bio-Mass Power (c) Solar Power (d) Urban & Industrial Wastes & (e) Small Hydro Power Projects of capacity less than or equal to 25 MW.
RRVUNL	Rajasthan Rajya Vidyut Utpadan Nigam Limited
RTC	Round the Clock
RVPNL	Rajasthan Rajya Vidyut Prasaran Nigam Limited
SEB	State Electricity Board
SJVNL	Satluj Jal Vidyut Nigam Limited
SR	Southern Region
SSNNL	Sardar Sarovar Narmada Nigam Limited
STPS	Super Thermal Power Station
THDCIL	Tehri Hydro Development Corporation of India Ltd.
UG	Under Ground
Utg.	Undertaking
UJVNL	Uttaranchal Jal Vidyut Nigam Limited
UN	United Nations
UPCL	Uttarakhand Power Corporation Limited
UPJVUNL	Uttar Pradesh Jal Vidyut Utpadan Nigam Limited
UPPCL	Uttar Pradesh Power Corporation Limited
UPRVUNL	Uttar Pradesh Rajya Vidyut Utpadan Nigam Limited
UT	Union Territory
UTILITIES	Utility means the electric lines or electrical plant, and includes all lands, buildings, works & materials attached thereto belonging to any person acting as a generating company or licensee under the provisions of the Electricity Act, 2003.
VVNL	Vishwesharaiah Vidyut Nigam Limited
WBPDC	West Bengal Power Development Corporation Limited
WR	Western Region
The expansion of other abbreviations are given at the various tables of the publication wherever required.

Chapter 1

Review of Growth of Indian Electricity Sector

In the pre-independence era, the power supply was mainly in the hands of Private Sector that too restricted to the urban areas. Power development in India commenced with the Commissioning of first hydro unit of 130 kW (2x65 kW) generators at Sidrapong in Darjeeling during 1897, followed by first steam driven power plant rated 1000 kW (3x500 HP boilers) two years later at Calcutta in 1899 by CESC.

After independence, with the formation of State Electricity Boards (SEBs) in the various states of the country in the early 50s, a significant step was taken in bringing out systematic growth of power supply industry all over the country. A number of multipurpose hydro projects and installation of thermal and nuclear stations were taken up and thus power generation activity started increasing significantly.

The participation of Central Govt. in power generation programme started with the creation of two generating corporations viz. National Thermal Power Corporation (NTPC) for coal/gas-based capacity addition and National Hydro Power Corporation (NHPC) for Hydro development during the year 1975, which gave a fillip to the growth of power sector in the country. The setting up of Nuclear Power Corporation Ltd. (NPCIL) started the addition of nuclear based Capacity. In transmission Sector, Power Grid Corporation of India Ltd. (PGCIL) gave further boost to the power development programme. The Central Government has historically played a leading role in providing for energy needs of the nation.

Introduction of Electricity Act-2003

To liberalize the development of power sector, the Government brought Electricity Act-2003 into force in June, 2003. It replaced the three existing legislations namely, Indian Electricity Act 1910, the Electricity (Supply) Act 1948 and Electricity Regulatory Commission Act, 1998.

Further, the Electricity Act-2003 consolidates laws relating to generation, transmission, distribution, trading and use of electricity. It provides measures conducive to development of electricity industry, promoting competition therein, protecting interest of consumers and supply of electricity to all areas, rationalization of electricity tariff, ensuring transparent policies regarding subsidies, promotion of efficient and environmentally benign policies,

constitution of Central Electricity Authority, Regulatory Commissions and establishment of Appellate Tribunal and for matters connected therewith or incidental thereto

The Electricity Act-2003 spurred the electricity growth due to introduction of some major aspects as follows:

- a) **Increased competition:** The Act removed the need for government approval for private power plants, which led to a significant increase in private investment and the development of new generating capacity.
- b) **Open Access:** It mandated that transmission and distribution companies allow non-discriminatory open access to their networks, enabling large consumers to buy power from any producer.
- c) **Market liberalization:** By dismantling the single-buyer model and licensing trading as a distinct activity, the Act helped create a more competitive market structure.
- d) **Improved efficiency:** The unbundling of State Electricity Boards (SEBs) into separate generation, transmission, and distribution entities aimed to improve operational efficiency and transparency.
- e) **Consumer protection:** The Act created national and state-level regulatory bodies e.g. CERC and SERCs to ensure transparent tariff structures and protect consumer interests.
- f) **Universal access to Electricity:** A key objective was to ensure the supply of electricity to all areas, including both rural and urban areas.
- g) **Renewable energy promotion:** The Act included provisions, such as Renewable Purchase Obligations (RPOs), and set preferential tariffs and competitive bidding to encourage renewable energy development.

Major growth analyses of the power sector in the country from 1950 up to 31st March, 2024 is reviewed below:

1. Installed Electricity Generation Capacity

- The total installed capacity of utilities was only 1713 MW as on 31.12.1950.
- **As on 31st March 2024**, the All India installed capacity (excluding captive capacity) has increased to 441969.59 MW consisting of 46928.17 MW hydro, 243216.91MW thermal, 8180.00 MW nuclear and 143644.50 MW renewable energy taking into account the addition of new capacity and up-ration/de-ration of existing capacity and retirement of old and inefficient units at the end of the year 2023-24.

The details of growth of installed capacity (conventional & RES) is given at **Table 1.2.**

- During the period 2014-24 the Installed Capacity of RES (excluding large Hydro) has grown from 34988 MW as on 31.03.2014 to 143644.505 MW as on 31.03.2024 registering a CAGR of 15.17%.

- The total installed capacity of captive power plants in industries having demand of 0.5 MW & above, at the end of the fiscal year 2023-24 has grown to 80926.07 MW out of which the contribution of hydro was 120.01 MW, steam 46064.31 MW, diesel 19604.07 MW, gas 6204.31 MW, and RES 8933.82 MW.

Growth of captive power plant details are given at **Table 1.5**.

2. Gross Electricity Generation

- All India gross electricity generation which was 5106 GWh during the year ending 31.12.1950 grew up to 1734375.09 GWh (excluding generation from captive plants) during the year 2023-24 constituting 134053.93 GWh Hydro, 1326548.92 GWh Thermal, 47937.41 GWh Nuclear and 225834.83 GWh RES (Renewable Energy Sources).

Yearly details of generation growth are given at **Table 1.3**.

- During the period 2014-24 the Generation from RES (excluding large Hydro) has grown from 65520 GWh during FY 2013-14 to 225834.83 GWh during FY2023-24 registering a CAGR of **13.17%**.

- Electricity generated from the captive electricity generation plants during the year 2023-24 was 223902.69 GWh, constituting 273.57 GWh from hydro, 183093.29 GWh from steam, 10157.69 GWh from diesel, 21677.33 GWh from gas and 8700.81 GWh from RES.

Details are given at **Table 1.6**.

3. Electric Power System Losses

- The electricity lost in transformation, transmission and distribution system and electricity unaccounted worked out to 288884.98 GWh during the year 2023-24 representing 17.63% of the total available electricity.
- Amongst all the regions percentage system losses were maximum in Northern Eastern Region i.e. 20.11%.
- This was followed by Northern Region with 19.79%, Southern Region with 16.09% losses and Western Region with 16.05%.

4. Electricity Consumption (Utility+Non-Utility)

- The consumption of electricity was 5610 GWh as on 31.12.1950. The consumption has been increased to 1539819 GWh during the year 2023-24.

Details are given at **Table 1.4 & 1.7**.

- The Industrial, Domestic and Agricultural categories constitute the major categories of consumers of electricity with a total of more than 83.86%, comprising of about 41.60%, 23.97% and 17.89% respectively of the total consumption including non-utilities.

5. Rural Electrification

- The total number of villages electrified as on 31.12.1950 was 3061.
- The total number of villages electrified as on 31.03.2023 rose to 597464 representing 100% of the total number of villages so far as per new definition of villages electrification reported in February 2004.

Details are given at **Table 1.1**.

6. Transmission & Distribution Lines

- The length of transmission and distribution lines which was 29271 ckt. kms as on 31.12.1950 rose to 14706316 ckt. kms as on 31st March 2024.

Details are given at **Table 1.1**.

7. Per Capita Electricity Consumption

- The per capita electricity consumption which was 18.17 kWh during 1950, has increased to 1400 kWh during the year 2023-24.

Details are given at **Table 1.1**.

Key indices of plan-wise growth of the Indian Electricity Sector are given in the tables contained in the next part of this Chapter.

Table 1.0
Overview of All India Installed Capacity, Generation and Per Capita Consumption of
Electricity
2023-24

A Installed Capacity as on 31.03.2024

(i) Utilities								(MW)

Chapter 2

Organizational Structure of Electricity Supply Industry in India

Formation of State Electricity Boards in various parts of the country started in the early 1950s to bring about systematic growth of power supply industry all over the country. In the year 1996-97, there were 18(eighteen) State Electricity Boards and 37(thirty-seven) State/ Central/ UTs owned undertakings/ corporations/ electricity departments dealing in generation/ transmission/distribution of electricity. The process of unbundling of SEBs first started in Odisha with the formation of GRIDCO & OHPC Ltd. in the year 1996-97. With the promulgation of the Electricity Act 2003, all the SEBs have been unbundled.

- As on 31st March 2024, there were one hundred fifty-one (151) Companies, Power Corporations, Management Boards under Central, State or Joint partnership existing in the country which are engaged in Generation, Transmission and Distribution apart from eleven (11) Electricity Departments in the States and Union Territories.
- As on 31.03.2024, there were fifty-nine (59) Power Trading Companies and one hundred fifty-seven (157) private licensees including Electric Supply Co-operative Societies existing.

The list of various utilities in the public as well as in the private sector responsible for electricity generation, transmission, distribution and trading in the country is given in **Tables 2.1 to 2.5**.

Chapter 3

Installed Capacity

- The total installed capacity in the country including captive power plant (Industries having demand of 0.5 MW and above) increased to 522895.66 MW as on 31.03.2024 as compared to 494458.71 MW as on 31.03.2023.
- The net addition in FY 2023-24 in generating capacity amounted to 25910.70 MW (Hydro-78.00 MW, Thermal-5948.00 MW, Nuclear-1400.00 MW & Renewable Energy Sources-18484.70 MW).
- **The increase in All India Installed Capacity including captive power plant capacity as on 31.03.2024 over the last year (as on 31.03.2023) was 5.75%.**
- The total installed capacity comprises 298325.08 MW from conventional sources (Utilities), 143644.51 MW from Renewable Energy Sources and 80926.07 MW from Industrial and Non-Industrial Captive power plants.

Utilities

- Installed capacity (Utilities) in the country increased to 441969.59 MW as on 31.03.2024 as compared to 416058.89 MW as on 31.03.2023 thereby registering an **increase of 6.23%** over the previous year.
- **The total net addition in generating capacity amounted to 26080.70 MW with a majority share from Renewable Energy Sources (RES).**
- The total net addition in generating capacity from conventional sources viz Hydro, Thermal & Nuclear amounts 7596.00 MW.
- The total net addition in generating capacity from Renewable Energy Sources amounts to 18484.70 MW. Addition of installed generating capacity from renewable energy sources has been taken into account as per the data received from Ministry of New and Renewable Energy.

- The installed capacity of thermal generating units continued to form the largest share of the installed generating capacity followed by RES.
- The relative percentage of capacity of hydro, thermal, nuclear and renewable energy sources has been 10.62%, 55.03%, 1.85% and 32.50% respectively as on 31.03.2024.

- Further, the total capacity of RES (including large hydro) 190572.68 MW comprises of 46928.17 MW of Large Hydro, 5003.25 MW of Small Hydro, 45886.51 MW of Wind Power, 10941.15 MW of Bio-Power and 81813.60 MW of Solar Power.

- **During the period of 10 years the Installed Capacity of RES (excluding large Hydro) has grown from 34988 MW as on 31.03.2014 to 143645 MW as on 31.03.2024 registering a CAGR of 15.17%.**

Non-Utilities (Captive Power Plants)

- The installed capacity (non-utilities) in respect of Industries having demand of 0.5 MW and above in the country increased to 80926.07 MW as on 31.03.2024 as compared to 78399.82 MW as on 31.03.2023 thereby **registering an increase of 3.22% over the previous year.**
- In the total capacity of non-utilities, the contribution of hydro, steam, diesel, gas and RES capacity had been recorded as 0.15%, 56.92%, 24.22%, 7.67% & 11.04% respectively.

The various tables in the chapter from **3.1 to 3.11** gives the salient features of the Installed Capacity in the country as on 31st March, 2024.

Chapter 4

Electricity Generation

Generation - Utilities

- The All-India gross electricity generation by the Utilities during the year 2023-24 was 1734375.09 GWh as compared to 1617904.85 GWh during 2022-23.
- **During the year 2023-24, the All-India generation from utilities has shown an increase of 7.20%.**
- During the year 2023-24, the generation from Hydro, Thermal, Nuclear and Renewable Energy Sources (excluding large hydro) has been 134053.93 GWh, 1326548.92 GWh, 47937.41 GWh and 225834.83 GWh respectively.
- The respective percentage of this generation with respect to gross generation from Hydro, Thermal, Nuclear and Renewable Energy Sources (excluding large hydro) has been 7.73%, 76.49%, 2.76% & 13.02% respectively.

- **Total generation from thermal sources (Coal, Lignite, Diesel and Gas) is highest and about 76.49% of the total generation.**
- The total generation from Renewable Energy Sources (RES) including large hydro is about 20.75% in the FY 2023-24.
- The Gross Generation during 2023-24 in Central, State and Private Sector was 586424.86 GWh, 470243.22 GWh and 677707.00 GWh constituting 33.81%, 27.11% and 39.07% respectively.
- Private Sector has the largest share in total generation followed by Central Sector.
- **During the period 2014-24 the Generation from RES (excluding large Hydro) has grown from 61785 GWh during FY 2013-14 to 225835 GWh during FY 2023-24 registering a CAGR of 13.84 %.**

Generation - Non-Utilities (Only Captive)

- Besides electricity generation by the Public Utilities, during the year under review captive electricity generating plants of industries in the Industrial Sector having demand of 0.5 MW & above have produced 223902.69 GWh comprising 273.57 GWh from hydro, 183093.29 GWh from steam, 10157.69 GWh from diesel, 21677.33 GWh from gas and 8700.81 GWh from RES respectively.
- Gross generation from steam based captive Power Plants is a major contributor amounting to about 82% of the total captive generation.

Total Generation (Utilities + non-utilities)

- The total electricity produced in the country including non-utilities during the year 2023-24 was 1958277.78 GWh as compared to 1829836.66 GWh during the year 2022-23.
- Thus, the electricity generation has registered an increase of 7.02% over previous year's generation.

Tables 4.1 to 4.7 give break-up details of electrical energy generation Mode-wise, State-wise, Region-wise and Sector-wise.

Table 4.1
All India Gross Electricity Generation Mode-wise

Chapter 5

Captive Power Plants

Power intensive Industries such as Aluminium, Cement, Chemicals, Fertilizers, Iron & Steel, Paper and Sugar etc. have set up their own captive power plants, either to supplement the electricity purchased from the Utilities, or for emergency use to protect against unreliable grid power such as power restriction/failure/cut. Energy is also produced as a by-product of certain industrial processes. The captive power plants of industries may be allowed to sell their surplus power, if any, to the Grid, on a remunerative tariff, as per mutually agreed terms.

The information has been collected from the industries with demand of 0.5 MW and above having their own captive power plants. The same has been compiled in this section of the book. Details were received from 9991 industrial units with demand of 0.5 MW and above having Captive generation plants

- The total installed capacity of such captive generating power plants was 80926.07 MW as on 31.03.2024.
- **The installed capacity has registered a growth of 3.22% over the total installed captive power plant capacity of 78399.82 MW as on 31.03.2023.**
- The contribution of Hydro, Steam, Diesel, Gas and RES capacity had been 0.15%, 59.92%, 24.22%, 7.67% & 11.04% respectively in the total capacity as on 31.03.2024.

- The Captive Power Plant generated 223902.69 GWh during 2023-24 and registered an increase of 5.65% over the generation of 211931.81 GWh during 2022-23.
- The contribution of Hydro, Steam, Diesel, Gas and RES generation had been 0.12%, 81.77%, 4.54%, 9.68% and 3.89% respectively in the total captive generation.
- In the year 2022-23, Industrial Sector is the largest consumer of energy which has consumed about 42.26% of total electricity consumption in the country.

The Tables 5.1 to 5.11 give the details of electricity generation, consumption and installed capacity of captive electricity plants mode-wise, industry-wise & state-wise in respect of Industries with demand of 0.5 MW & above and having Captive generation plants.

Chapter 6

Electric Power Supply and System Losses

- During the year 2023-24 gross electricity generation (utilities) was 1734375.09 GWh, out of which 106650.46 GWh representing **6.15% of gross generation was consumed in power station auxiliaries**. Thus, net generation available at the bus-bar was 1627724.63 GWh.
- Electricity purchased by public utilities from captive power plants was 16400.28 GWh and electricity imported from Nepal & Bhutan was 6147.23 GWh. Thus, the total electricity available for supply during the year was 1650272.14 GWh as compared to 1549456.08 GWh during the year 2022-23.
- Electricity sold to various classes of consumers during the year 2023-24 was 1350091.99 GWh and electricity exported outside the country i.e. to Nepal, Bhutan, Bangladesh and Myanmar was 11295.19 GWh.
- **The electricity lost in transformation, transmission and distribution system and electricity unaccounted worked out to 288884.97 GWh representing 17.63 % of the total available electricity.**
- **The T&D Loss in country has decreased by 0.05% from 17.68% in FY 2022-23 to 17.63 % in FY 2023-24.**
- Amongst all the regions percentage system losses were maximum in North-Eastern Region i.e. 20.11%. This was followed by Northern Region with 19.79%, Eastern Region with 19.41%, Southern Region with 16.09% and Western Region with 16.05% losses.

The percentage losses in transmission & distribution network correspond to ultimate consumption within various States/Union Territories. The tables 6.1 to 6.5.6 represent the Region-wise and State-wise Transmission & Distribution losses, transfer of electrical energy among regions and electricity consumed in power auxiliaries.

Table 6.1
All India Electrical Energy Generated, Purchased, Sold and Losses
Utilities
2023-24

Sl. No.	Item	Energy (GWh)	Percentage (%) of Sl. 1
1	Gross Energy Generated (Utilities)	1734375.09	100.00
2	Energy Used in Power Station Auxiliaries	106650.46	6.15
3	Net Energy at bus bars (1-2)	1627724.63	93.85
Percentage (%) of sl. 4			
4	Energy at bus bars (same as 3)	1627724.63	100.00
5	Energy purchased from Non-Utilities	16400.28	1.01
6	Energy Imported from other country	6147.23	0.38
7	Total Energy Available (4+5+6)	1650272.14	101.39
8	Energy sold to other countries	11295.19	0.69
9	Net Energy Available for Supply (7-8)	1638976.96	100.69
Percentage (%) of sl. 10			
10	Net Energy available for supply (same as 9)	1638976.96	100.00
11	*Energy sold to ultimate consumers	1350091.99	82.37
12	Energy loss in transformation, transmission and distribution and unaccounted for (10-11)	288884.97	17.63

Note: * Includes metered and assessed supply to agricultural consumers.

Chapter 7

Operating Data of Utilities

Fuel Consumption

- There are 186 Nos. of Coal fired thermal stations operating in the country as on 31.03.2024.
- CEA is monitoring fuel consumption of 186 stations having Installed Capacity 210969.50 MW.
- For the year 2023-24, the Coal consumption of 186 stations was 849.72 Million Tonnes.

Thermal Efficiency

- The total numbers of Coal/Lignite/Multi-fuel Power Stations ending March 2023 were 198 having an aggregate installed capacity of 217589.5 MW. Out of these, 186 Stations are coal fired and 12 are of Lignite fired.
- CEA has received actual data of 154 Thermal Power Stations. These Thermal Power Stations have capacity of 181869.5 MW.
- Average calorific value of the last year 2022-23 for the remaining stations have been taken for calculation of thermal efficiency.
- 2.73% stations are operating below 25%, 6.56% stations are operating at 25% to 30%, 32.79% stations are operating at 30% to 35% and 57.92% stations are operating at above 35% efficiency.

Plant Load Factor

- Under Private Sector, Jharkhand recorded the highest PLF of 84.81%.
- All India Plant Load factors of Central Sector Thermal Power Stations were 75.09%. All India Plant Load Factors of State and Private Sector of Thermal Power Stations were 64.70% and 67.65% respectively.

- All India PLF of all Nuclear Power Stations in the country was 74.70%.

Manpower

- Amongst State Electricity Corporations/Undertakings that have reported the engaged manpower, Maharashtra State Electricity Distribution Co. Ltd. (MSEDCL) had the highest manpower engaged as regular & non-regular
- MSEDCL was followed by Tamil Nadu Generation & Distribution Corporation Ltd. and Tamil Nadu Transmission Corp. Ltd.

The tables that follow in this Chapter give figures of fuel consumption, thermal efficiency-based classification of steam stations, specific coal consumption, plant load factor, manpower, peak demand met etc.

CHAPTER 8

ELECTRICITY TRANSMISSION AND DISTRIBUTION SYSTEM

Electric power transmission is the bulk movement of electrical energy from a generating site such as a power plant to an electrical substation close to the location of beneficiary of the plant /consumers. The interconnected lines which facilitate this movement are known as a transmission network. The interconnected lines which facilitate the distribution of electrical energy at lower voltages to consumers are known as distribution network.

Electric power may flow through several substations interconnecting the transmission & distribution lines at different voltage levels. A substation may include transformers to transform voltage from low to high (Step Up Transformers), high to low (Step Down Transformers) and high to low (at distribution level) (Distribution Transformers).

I. Transmission and Distribution

An extensive network of Transmission and Distribution lines has been developed over the years for evacuating power produced by different electricity generating stations and distributing the same to the consumers. Depending upon the quantum of power and the distance involved, lines of appropriate voltages are laid. The nominal Extra High Voltage lines in vogue are ± 800 kV, ± 500 kV HVDC & 765 kV, 400 kV, 230/220 kV, 132/110 kV and 66 kV AC lines. All these lines have been installed by Generation/ Transmission/ Distribution Utilities including Central Sector Organizations and State/UT Electricity Departments.

- The standard voltage of operation on the distribution side is 33 kV, 22 kV, 11kV, 400/230 Volts besides 6.6 kV, 3.3 kV and 2.2 kV.
- **The State of Uttar Pradesh has the largest Transmission and Distribution network of 1687512.3 Ckt. Kms in the country.** Apart from Uttar Pradesh the States of Maharashtra, Rajasthan, Karnataka, Madhya Pradesh, Gujarat, Tamil Nadu, & West Bengal have more than 84 lakh Ckt. Kms. of T&D Lines.

The following table depicts the length of lines operating at various voltages as on 31.03.2024 in the country with percentage increase over previous year:

Sl. No	Voltages	Length of Lines (Ckt. kms.)		% Growth
		31.03.24	31.03.23	
A	Transmission Lines			
1	±800 kV HVDC	9656	9656	0.00
2	±500 kV HVDC	9432	9432	0.00
3	± 320 KV HVDC	330.34	330.00	0.10
4	765kV	54888	52573	4.40
5	400 kV	202544	197726	2.44
6	230/220 kV	209925	207776	1.03
7	132/110/90 kV	244505	236593	3.34
8	78/66 kV	79897	76669	4.21
9	33/22/20 kV	569762	543826	4.77
10	15/11 kV	5019387	4871967	3.03
11	6.6/4.4/3.3/2.2 kV	37585	36853	1.99
Total (A)		6437913	6243402	3.12
B	Distribution lines			
12	Up to 500 volts	8268403	8180237	1.08
Total (B)		8268403	8180237	1.08
Total (All India) (A+B)		14706316	14423639	1.96

II. Transformers

- **The total number of step-up transformers** installed at various electricity generating stations and sub-stations in the country as on 31st March, 2024 were 5808 having aggregate capacity of 363211 MVA.
- **The total numbers of step-down and distribution transformers** were 145011 and 16922332 with aggregate capacity of 2487920.97 MVA and 830872.2 MVA respectively.

Chapter 9

Electricity Utilization

I. Electrical Energy Consumption

- Electricity consumption by various categories of consumers served by utilities during the year 2023-24 was 1350091.99 GWh registering an increase of 6.80% over previous year.
- During the year 2023-24, the major portion of electricity viz. 1240415.12 GWh representing 91.88% of the total energy consumption was distributed by the Public Sector and remaining 8.12% was distributed by the private sector (including Cooperatives Societies).
- Out of 91.88% of energy distributed by the Public Sector, the Municipalities distributed 0.46% and the Electricity Departments of the States and Union Territories and State Govt. distribution companies distributed balance 91.42%.
- The five major private licensees viz. TATA Electric Companies, Calcutta Electric Supply Corporation (CESC), Torrent Power Ltd., Adani Electricity Mumbai Limited and BSES Ltd. distributed 3.45%, 0.8%, 0.92%, 0.73% and 1.51% adding up 7.41% only and the balance of 0.71% of total energy was distributed by Rural Co-operative Societies and other private licensees to its consumers respectively.
- The details of energy sold by various agencies during 2023-24 are tabulated below: -

Sl. No	Agency	Electrical Energy Sold to Ultimate Consumers		
		Quantum (GWh)	% of total Consumption	% increase over 2022-23
1.	Elect. Deptts. of State & UTs/State Govt. Distribution Companies	1234211.87	91.42	7.68
2.	Municipalities	6203.25	0.46	6.41
3.	Private Licensees (including Coop. Societies)	109676.87	8.12	-2.12
	Total	1350091.99	100.00	6.80

- Data prior to FY 2021-22 includes demand of 1MW and above regarding energy consumed by various classes of consumers.
- The Industrial category of consumers, as usual consumed highest energy i.e 33.34% of total energy sold by Utilities as compared to 33.04% during 2022-23. The energy sales to Industrial consumers registered an increase of 7.77% over the previous year.
- Domestic consumers, the second largest category amongst the consumers consumed 27.34% of total energy sales as compared to 27.94% during the previous year. The consumption of energy under this Sector increased by 4.5% over the previous year.
- Agricultural consumers, the third largest category amongst the consumers consumed 20.40% of total energy sales as compared to 19.29% during the previous year. The consumption of energy under this Sector increased by 12.97% over the previous year.
- The electricity consumption in the Commercial category during the year was 128623.20 GWh registering a growth of 9.72% while the electricity consumption in the Public Lighting category was 9350.78 GWh.
- There is overall increase of 6.8% in total energy consumption over the previous year.

II Electricity Consumption Pattern (Utilities & Non-Utilities)

- Over the past few years, spurt of industrial growth has been witnessed in shaping the national economy. Electricity has been playing a pivotal role in the development of industrialization of the country.
- The total electricity consumed including utilities and non-utilities during the year 2023-24 was 1540586.99 GWh as compared to 1440310.82 GWh during the year 2022-23 registering growth of 6.96% over the previous year.
- The share of total Domestic consumption was 23.96% during the year 2023-24 as compared to 24.52% during the year 2022-23 and registered a growth of 4.5% over the previous year.
- The share of Traction consumption was 2.20% during the year 2023-24 as compared to 2.08% during the year 2022-23 and registered a growth of 12.96% over the previous year.

- The share of Industrial consumption was 41.58% during the year 2023-24 as compared to 41.23% during the year 2022-23 and registered a growth of 7.87% over the previous year.

III. Per Capita Electricity Consumption

The per capita consumption of electricity on All India basis works out to 1400 kWh for the year 2023-24 against 1331 kWh in the year 2022-23. Per Capita Electricity Consumption is worked out as the total gross electrical energy consumed divided by Mid-Year Population during the year. The details are shown in **Table 9.9**.

IV. Electrical Accidents

To the extent of information made available for the year 2023-24, the total number of electrical accidents reported was 13095 which comprised 5594 human fatal accidents, 2267 human non-fatal accidents, 5230 animal fatal accidents and 4 animal non-fatal accidents. The details of electrical accidents are displayed in **Table 9.10**.

Note:

1. **Per Capita Electricity Consumption** = (Gross Electricity Consumed/Mid Year Population)

2. **Gross Electricity Consumed** = Availability to State (i.e. State own Generation + Drawal From regional Grid)+Auxiliary Consumption+Gross Captive Electricity Consumption out of Self Generation

3. **Population**

State wise Mid Year Population (1st Oct of year 2023) as projected by Registrar General of India.

CHAPTER 10

Electricity Consumers and Connected Load

The electricity consumers have been categorized into different categories such as Domestic, Agricultural, Commercial, Industrial (LV & MV), Industrial (HV), Public Lighting, Railway Traction, Public Water Works including other miscellaneous consumers. The **Table 10** shows the details of consumers and connected load of different categories in various States/Union Territories.

- As on 31.03.2024, the total number of electricity consumers were about 357.58 million and the connected load was 933902 MW for all the categories in the country.
- Domestic consumer's category continues to have maximum number of consumers benefiting from electricity followed by commercial and agricultural categories.

The Domestic consumers had the maximum connected load of 393285 MW followed by Industrial and Agricultural sectors having connected load of 196049 MW and 161243 MW respectively.

Chapter 11

Urban & Rural Electrification

High priority continued to be attached to the implementation of rural electrification work. The programme included among other measures, maximization of electricity generation, electrification of villages and rural households as speedily as possible and improve irrigation through energization of pump sets. Rural electrification is the responsibility of State Governments/State Electricity Departments/Distribution Companies which own & operate the distribution system in the State. Rural electrification schemes are formulated and implemented by the State Governments according to the priorities fixed by them and depending upon the availability of financial resources & other inputs.

The funds for rural electrification programme are provided by the Government of India under Deen Dayal Upadhyaya Gram Jyoti Yojana (DDUGJY) scheme and supplemented by financial institutions like REC Ltd.

The prevailing definition of village electrification modified in Feb. 2004 states: "A village would be declared as electrified if Electricity is provided to public places like Schools, Panchayat Office, Health Centres, Dispensaries, Community Centres etc. and the number of households electrified are at least 10% of the total number of households in the village."

The **Tables 11.1 to 11.3** gives the details of Urban Electrification, Rural Electrification and existing irrigation Pump sets / Tube wells in the country.

- As per the information received from the MIS of DDUGJY as on 31st March 2024, the total number of villages electrified was 597464 out of total number of villages of 597464 in the country representing 100 %.
- All the States/UTs have achieved 100% village electrification as per the above definition.
- As per census 2011 data, all the towns i.e. 7935 towns are already electrified in the country.
- The total number of existing irrigation pump-sets/tube-wells in the country were 27583714 as on 31st March, 2024.
- Maharashtra has maximum number of energized pump- sets (4476130) followed by Karnataka (3144713).

- The average capacity and electricity consumption per pump-set was 5.85kW and 9987 kWh respectively.
- The electricity consumption during 2023-24 in Agriculture sector is third highest being 17.88% of total consumption of electricity in the country.

Chapter 12

Power Trading

Power Trading has been instituted with incorporation of Power Trading Corporation of India in the year 1999. Enactment of Electricity Act, 2003 paved a way for developing market for optimal utilization of energy; promote exchange of power with the neighboring countries and easy access for exchange of power within the country from surplus to deficit system.

The Power Trading has been incorporated in the General Review with a view that it may be useful to the utilities. The chapter enumerates the Power Trading Licensees along with category they belong to and their status during the year followed by state-wise Import/Export of energy during the year.

- There are Fifty Nine (59) numbers of trading companies having trading license as on 31-03-2024. These trading companies have been classified as per the volume of trade permitted during the year, based on category of license for trading (I-V).
- The total volume of electrical energy traded by the companies during 2023-24 was 24431.93 GWh which constitute 1.41 % of the total generation from utilities as against 17262.86 GWh which constituted 1.07% of the total generation from utilities in the previous year 2022-23.
- Out of total volume of trade of 24431.93 GWh, NVVN which has traded 7827.55 GWh constituting 32.04 % of total volume of trade.
- NVVN was followed by TPTCL which traded 5053.14 GWh constituting 20.68%, PTC which traded 4623.84 GWh constituting 18.93%, AEL which traded 1995.36 GWh constituting 8.17%.
- The total traded volume of the above four traders amounts to 79.82% of the total volume of electricity traded by all 59 Nos. of trading companies.
- Maximum volume of electricity was traded by trading companies is between sale price range of Rs 7.001 per kWh to Rs 8.000 per kWh.
