# INTERNAL AUDIT

Internal Audit is an independent and objective assurance and consulting activity designed to add value and improve the Bank's operations through a systematic approach by evaluating and enhancing the effectiveness of risk management, internal control, and the Bank's governance processes.

BSI's Internal Audit Unit (SKAI) is the unit responsible for performing the Internal Audit function through assurance and advisory activities. SKAI operates independently and objectively, with the objective of adding value and providing improvement recommendations to the Bank's operations through a systematic, risk-based approach and by assessing the effectiveness of risk management, internal control, and governance processes.

The active role and oversight of the Board of Directors and the Board of Commissioners over the Internal Audit function at BSI are carried out on an ongoing basis to ensure independence, objectivity, and effectiveness in accordance with SEOJK No. 14/SEOJK.03/2025. The Board of Directors is responsible for strengthening the risk-based internal control framework, ensuring adequate access to information, following up on audit findings, and providing sufficient resources and budget for SKAI. The Board of Commissioners performs its supervisory role by ensuring the adequacy and effectiveness of the internal control system, conducting periodic reviews based on SKAI reports, and appointing an independent external quality assurance reviewer, taking into account the Audit Committee's recommendations.

In performing the internal audit function, BSI maintains regular communication with the OJK at least once a year to discuss key risk areas, risk mitigation measures, follow-up actions on identified weaknesses, internal audit findings and recommendations, and the annual audit plan. The Bank follows up on OJK recommendations to enhance the effectiveness and efficiency of the internal audit function. The Bank's Code of Conduct is formally stipulated in internal regulations, including the Company Regulation (Peraturan Perusahaan/PP) of PT Bank Syariah Indonesia Tbk for the 2025-2027 period (PP BSI) and its implementing provisions. The PP BSI is accessible to all levels of management and employees through the intranet network, as part of efforts to reduce paper usage and support the sustainable finance programme.

The dissemination and socialisation of the Code of Conduct aim to enhance understanding and consistent implementation among all BSI employees. Through these efforts, management and employees are expected to comply fully with the applicable provisions. Socialisation activities are carried out by management and the relevant work units.

One of the socialization programs conducted regularly was "Jumat Berkah" and "Munajat Jumat", which served as a platform to convey the Company's values, namely AKHLAK, as the core values for BSI employees. ### Efforts to Implement and Enforce the Code of Conduct

The effective implementation and enforcement of the Code of Conduct are essential to safeguarding integrity, transparency, and accountability across all organisational activities. In demonstrating its commitment to ethical values, BSI has undertaken concrete and consistent measures, one of which is the implementation of an Integrity Pact signed by all levels of management and employees.

The Integrity Pact represents a tangible manifestation of BSI's commitment to high ethical standards. All individuals within BSI, from management to employees, are required to sign the Integrity Pact as formal acknowledgment of and adherence to the applicable Code of Conduct. This requirement reinforces the principle that every action and decision taken must reflect the ethical and moral standards established by the Company.

The Integrity Pact is renewed on an annual basis, underscoring BSI's ongoing commitment to ensuring that all personnel remain aligned with prevailing values, policies, and ethical standards. This annual renewal also serves as a mechanism to reinforce compliance with the Code of Conduct and provides an opportunity to incorporate updates in response to regulatory developments or changes in the business environment.

Through these measures, BSI seeks not only to strengthen awareness and compliance with the Code of Conduct among its employees and management, but also to foster a professional, responsible, and integrity-driven work culture. The enforcement of the Code of Conduct through the Integrity Pact is expected to mitigate potential ethical violations and enhance public trust in BSI as a reliable financial institution with strong ethical foundations.

Gratification is one of the prohibited acts that may lead to fraud and corruption. To mitigate such risks, BSI has established an Operational Technical Guideline (Petunjuk Teknis Operasional/PTO) on Gratification Control, which is continuously socialised throughout the Bank's organisation.

Through the implementation of gratification control, all employees are expected to:

2. All Bank personnel are required to avoid and refuse any gratification that may be considered bribery, whether originating from external or internal parties, that is related to their position and contrary to their duties as Bank officers.
3. If a gratification cannot be refused at the first opportunity, the recipient must return the gratification no later than 24 hours after receipt and report the return to the Gratification Control Unit (Anti-Bribery – Compliance Group), accompanied by authentic evidence of the return, such as a handover report signed by the recipient and the giver or proof of deposit/transfer if the gratification is in cash.
4. Bank personnel who refuse or receive gratification are required to report such refusal or receipt to the Gratification Control Unit via email at: [antibribery@bankbsi.co.id](mailto:antibribery@bankbsi.co.id) and/or WhatsApp at 08118 451 451 no later than 10 (ten) working days from the date of refusal or receipt, with a copy to the reporting unit head.
5. The Gratification Control Unit reviews reports of gratification refusal or receipt, determines the classification of the gratification, and issues a Gratification Determination Letter no later than 30 (thirty) working days after complete receipt of the report and supporting documents.
6. Bank personnel are required to educate the giver or parties with potential conflicts of interest, in a proper and courteous manner, regarding the prohibition on receiving gratification deemed as bribery and/or other prohibited forms of gratification.

# CONFLICT OF INTEREST POLICY

BSI implements a Conflict of Interest Policy in line with SEOJK No. 14/SEOJK.03/2025 to uphold integrity and objectivity in all operational activities and decision-making processes. Accordingly, members of the Board of Directors, the Board of Commissioners, Bank Committees, the Sharia Supervisory Board (DPS), Executive Officers, and all employees are required to avoid any form of conflict of interest in carrying out their duties and responsibilities.

The Conflict of Interest Policy serves as a framework to identify, prevent, and manage potential conflicts of interest that may arise in the Bank's business activities. The policy regulates preventive and handling mechanisms, including decision-making procedures and mitigation measures, as well as administrative processes for recording, documenting, and disclosing conflicts of interest in meeting minutes or other official documents. In the event of a conflict of interest, the relevant party shall disclose the condition transparently during the decision-making process and must not take any action that may harm the Bank. Such disclosures are documented in meeting minutes, including the identity of the conflicted party, the nature of the issue, and the basis for the decision taken, with decision authority adjusted to ensure independence.

Through the consistent implementation of this policy, BSI ensures that all business activities and decisions are conducted professionally, transparently, and in the best interests of the Bank

Throughout 2025, there were no conflicts of interest involving BSI management that resulted in losses for the Bank. The Bank has taken several measures to prevent conflicts of interest, including:

1. e-Poster  
The Bank created electronic posters (e-posters) that were disseminated to all employees as a preventive measure against conflicts of interest.
2. Integrity Pact  
To prevent conflict of interest situations, all members of management and employees are required to submit an annual disclosure of any potential conflicts of interest as part of the Integrity Pact, which is managed by the Human Capital unit and integrated into the Bank's human resources system to support effective monitoring and prevention.
3. E-mail Blast

# INSIDER TRADING

As a publicly listed company, BSI complies with all applicable capital market laws and regulations. Compliance with capital market provisions is implemented by upholding key principles, including fulfilling the Bank's regulatory obligations in accordance with prevailing regulations and establishing a dedicated function within the Corporate Secretary responsible for ensuring compliance with capital market requirements, supported by clearly defined duties and responsibilities.

Provisions relating to insider trading are stipulated in the internal regulation, namely the Standard Operating Procedures of Corporate Secretary & Communication. Under these internal provisions, insider trading is defined as transactions involving the Company's or the Bank's securities, including but not limited to Sharia-compliant shares, pre-emptive rights (HMETD), Sharia bonds, and medium-term notes, conducted by parties who possess inside information. The use of such inside information to gain benefits in the capital market is categorised as an illegal activity.

Insiders are required to uphold the values set out in the Company's/Bank's Code of Conduct, including the following:

1. Ensuring that personal interests do not conflict with the interests of the Company/Bank.
2. Not abusing position or authority for personal or family interests.
3. Refraining from any misconduct that may damage professional integrity or the reputation of the Company/Bank.

The prohibitions on insider trading include the following:

# PROVISION OF FUNDS TO RELATED PARTIES AND LARGE EXPOSURES

Funding provision to related parties at BSI is governed by POJK No. 26/POJK.03/2021 on the Legal Lending Limit (LLL) and Large Exposures for Sharia Commercial Banks (BUS). Under this regulation, large exposures refer to the provision of funds to individuals or groups that are not classified as related parties, amounting to 10% or more of the Bank's core capital. The regulation stipulates that total funding to related parties is capped at a maximum of 10% of core capital, while funding to non-related parties is limited to a maximum of 25% of the Bank's Tier 1 capital. This POJK on BMPD for BUS has been effective since 1 January 2022.

To ensure compliance with these requirements, BSI has established the Bank Syariah Indonesia Financing Policy 2024, which regulates financing provisions to related parties, non-related parties, State-Owned Enterprises (SOEs), Regional-Owned Enterprises (BUMD), regional governments, as well as financing in foreign currencies. The implementation of this policy consistently refers to prevailing banking regulations, ensuring that all financing activities are conducted in accordance with standards set by the relevant authorities.

In practice, the funding follows standard financing procedures and is assessed based on reasonable returns for the Bank. As part of prudent risk management, any large exposure to a single borrower or a group of borrowers reaching 10% or more of the Bank's core capital is subject to heightened scrutiny. Such financing decisions are carefully reviewed by the Financing Committee, which comprises competent members, including the President Director, as a key decision-maker. In the absence of the President Director, the Vice President Director is authorised to assume this role in the decision-making process.

Throughout 2025, BSI did not record any violations or exceedances of the Legal Lending Limit.

Throughout 2025, BSI did not carry out any share buyback and/or bond buyback transactions.

## DISTRIBUTION OF FUNDS FOR SOCIAL ACTIVITIES, BOTH AMOUNT AND RECIPIENTS OF FUNDS

As part of its commitment to supporting the Sustainable Development Goals (SDGs), BSI Corporate Social Implementation programs aimed at delivering positive and sustainable impacts on the Bank's operating environment, surrounding communities, and stakeholders. As a Sharia-compliant bank, the design and implementation of these programs are consistently aligned with the principles of Maqashid Shariah, ensuring that social value creation goes hand in hand with ethical and responsible practices.

The distribution of ZISWAF funds is primarily directed to the eight asnaf categories, fakir, miskin, gharimin, muallaf, Ibnu Sabil, Riqab, Fii Sabilillah, and Amil, through partner institutions, and may also be extended to eligible individuals or institutions closely connected to the Bank as dzawil qurba. # RISK MANAGEMENT

BSI implements Risk Management in a structured, integrated, and continuous manner to support sustainable financial and operational growth. In line with the POJK Sharia Governance, BSI recognizes that business sustainability is closely influenced by risk exposures arising from banking activities, both directly and indirectly. As such, the Bank has established a comprehensive Risk Management Policy as an integral part of its Sharia governance framework, ensuring that all risk-taking activities remain consistent with Sharia principles, prudential banking practices, and applicable regulations.

BSI applies risk management as a fundamental management discipline that goes beyond regulatory compliance. Amid an increasingly dynamic external environment and the continuous development of products and services, effective risk management reflects the Bank's prudent approach in safeguarding business resilience, maintaining sound decision-making, and aligning risk exposure with the Bank's risk appetite, strategic objectives, and Sharia compliance commitments.

The implementation of effective risk management is intended to protect the Bank and its affiliated entities from potential adverse impacts arising from changes in the business environment that may result in financial or non-financial losses. At the same time, risk management functions as a value-creation enabler by strengthening institutional resilience, enhancing stakeholder confidence, and supporting sustainable performance in line with the objectives of Sharia banking.

The Bank's risk management framework comprises a series of methodologies and procedures to identify, measure, monitor, and control risks arising from all banking activities. BSI regularly evaluates the effectiveness of its risk management framework and continuously promotes risk awareness throughout the organization. This includes strengthening risk culture and ensuring effective oversight by the Board of Directors, the Board of Commissioners, and the Sharia Supervisory Board, to ensure consistent implementation of sound risk management and Sharia governance.

This training aims to enable employees to understand the types and factors of risk and the risk management techniques applicable at the Bank, covering the processes of risk identification, measurement, monitoring, and control, as well as how to communicate them. In 2025, this training was attended by 16,043 employees, with a passing rate of 99.92%.

### 2. Risk Management Certification (SMR)

## RISK MANAGEMENT

### BASIS FOR FORMULATION

The formulation of the Risk Management Policy at Bank Syariah Indonesia is based on the following:

1. Quran and Hadith
  - a. QS: As-Saff 61:4 "Indeed, Allah loves those who fight in His cause in a row as though they are a single structure joined firmly."
  - b. QS: Yusuf 12:67 And Jacob said: "O my sons, do not enter from one gate but enter from different gates; and I cannot avail you against [the decree of] Allah at all. The decision is only for Allah; upon Him I have relied, and upon Him let those who would rely [indeed] rely."
  - c. QS: Yusuf 12:46-49 When the servant met Joseph, he exclaimed, "Joseph, O man of truth, explain to us about seven fat cows eaten by seven lean ones, and seven green spikes of grain and others [that were] dry, that I may return to the people; perhaps they will know [about you]." Joseph said: "You will plant for seven years consecutively; and what you harvest leave in its spikes, except a little from which you will eat. Then will come after that seven difficult [years] which will consume what you saved for them, except a little from which you will store. Then will come after that a year in which the people will be given rain and in which they will press [olives and grapes]."
  - d. Al-Hadith (Dailami) "Indeed, Allah loves a servant who, when performing a task, does it carefully."
  - e. Al-Hadith (Baihaqi) "Caution is from Allah, and recklessness is from Satan."
  - f. Al-Hadith (Ahmad, Tirmidhi, Nasa'i, and Damiry) "Leave what makes you doubt for what does not make you doubt. Truth brings tranquility, and falsehood brings doubt."

The implementation of effective risk management requires the establishment of a strong and consistent risk culture and risk awareness across all lines of the organization. To ensure that Risk management, particularly risk management, can be carried out proactively and sustainably, BSI continues to encourage various initiatives to enhance risk awareness among all employees.

As a form of this commitment, BSI has developed a number of flagship programs focused on education, internalization of prudential values, and strengthening risk competencies, including through Operational Risk Awareness (OPERA), including Fraud Awareness, IT Security Awareness – Cyber Security Awareness, Compliance Awareness, Legal Risk Awareness, and Business Continuity Awareness.

These programs are designed to deepen employees' understanding and improve the quality of risk management at all levels of the organization. All of these awareness enhancement initiatives are implemented periodically and in an integrated manner at the head office and throughout BSI's entire network.

### BUILDING RISK AWARENESS CULTURE

In addition, the Bank continues to strengthen a sustainable risk culture through continuous learning and by increasing risk awareness across all levels of the organization through various programs, including Operational Risk Awareness (OPERA), Cyber Risk Awareness, Fraud Awareness, Compliance Awareness, and Business Continuity Awareness.

## RISK MANAGEMENT

### RISK MANAGEMENT SYSTEM

In implementing the risk management system, the Bank refers to 4 (four) pillars of risk management implementation, namely:

### ACTIVE OVERSIGHT BY THE BOARD OF COMMISSIONERS, BOARD OF DIRECTORS, AND SHARIA SUPERVISORY BOARD

As part of its commitment to implementing strong governance, the Board of Commissioners, Board of Directors, and Sharia Supervisory Board jointly play an important role in ensuring the effectiveness of risk management implementation at BSI. The active oversight of the Board of Commissioners, Board of Directors, and Sharia Supervisory Board is carried out comprehensively over all risks faced by the Bank, including country risk, cyber risk, and climate risk, through monitoring, providing strategic direction, and conducting periodic evaluations of the effectiveness of the risk management framework.

The Board of Commissioners carries out its oversight function on an ongoing basis through the Risk Oversight Committee, Integrated Governance Committee, and Audit Committee. This oversight is further strengthened through structured coordination with the Board of Directors and executive management, including Meeting of the Board of Commissioners, Board of Directors, and Sharia Supervisory Board.

At the executive level, the Board of Directors ensures active oversight with a high degree of intensity through various strategic committees, including the Risk Management Committee, ALCO Committee, IT Steering Committee, Business Committee, Policy & Procedure Committee, Human Capital Committee, and Steering Committee Crisis Management - Business Continuity Management. Internal coordination is also reinforced through routine forums such as Board of Directors Meetings and Directors-in-Charge Meetings. In parallel, the Sharia Supervisory Board performs periodic sharia oversight through meetings with executive management and maintains constructive communication with both the Board of Commissioners and the Board of Directors to ensure alignment between sharia compliance and risk management practices.

Through this integrated oversight framework, the Board of Commissioners, the Board of Directors, and the Sharia Supervisory Board work in close synergy to ensure that risk management implementation at BSI is carried out optimally, consistently, and in alignment with prudential principles and sharia values.

## RISK MANAGEMENT

### RISK MANAGEMENT POLICIES AND PROCEDURES AND RISK LIMIT SETTING

BSI establishes risk management policies aligned with the Bank's vision, mission, and strategic plan. These policies are complemented by procedures and implementation guidelines governing transaction and activity limits, as well as product and portfolio limits across the Bank.

#### Risk Management Policy

Risk management policies and procedures are formulated and implemented by taking into account the nature, scale, and complexity of the Bank's activities, its risk-taking level, risk tolerance, and risk profile. These policies are aligned with applicable laws and regulations, sharia principles, and sound banking practices. Key provisions in the implementation of risk management include:

1. The determination of risks associated with business activities is based on the Bank's analysis of inherent risks embedded in each activity, in line with the characteristics, scale, and complexity of the business.
2. The establishment of methods for risk identification, measurement, monitoring, and control, as well as risk management information systems, to accurately assess risk exposures arising from each business activity.
3. The determination of data to be reported, reporting formats, and types of information to be included in risk management reports, ensuring that reported information reflects relevant risk exposures considered in business decision-making, while upholding prudential principles and sharia compliance.
4. The setting of authority levels and tiered risk limits, including transaction thresholds requiring Board of Directors' approval, as well as the establishment of risk tolerance representing the maximum potential losses that can be absorbed by the Bank's capital, supported by monitoring tools to track the development of risk exposures.
5. The determination of risk profile ratings as a basis for identifying corrective actions for specific business activities and for evaluating the effectiveness of risk management policies and strategies.

6. A clearly defined organizational structure that sets out the roles and responsibilities of the Board of Directors, Board of Commissioners, Sharia Supervisory Board, committees, the Risk Management Unit, operational units, Internal Audit, and other supporting units.
7. The establishment of an internal control system in the implementation of risk management to ensure compliance with laws and regulations, applicable provisions, sharia principles, and internal policies; operational effectiveness and efficiency; the effectiveness of risk culture across all organizational levels; and the availability of complete, accurate, up-to-date, comprehensive, and timely risk management information.
8. The formulation of business continuity management policies to address potential severe internal and external conditions, ensuring the continuity of the Bank's operations, including disaster recovery plans and contingency plans.

#### Procedures and Risk Limit Setting

To ensure risk exposures remain well controlled, BSI establishes adequate policies and procedures as a common reference for all business and operational units. These include clearly defined risk limits designed to mitigate potential losses and safeguard the Bank's overall stability, with risk management embedded across all activities.

To manage risks arising from both internal and external factors, BSI implements a Risk Appetite Statement (RAS) and risk limits. The RAS serves as a guiding framework to accept, monitor, avoid, or optimize risks associated with business opportunities, enabling the Bank to pursue its targets dynamically while maintaining risks within manageable levels.

Risk limits are determined in line with the Bank's risk-taking capacity, risk tolerance, and overall business strategy, taking into account capital adequacy to absorb potential losses, historical loss experience, human capital capability, and compliance with applicable regulations and sharia principles.

## RISK MANAGEMENT

Risk limit procedures and determination cover:

1. Clear accountability and tiered delegation of authority.
2. Adequate documentation of procedures and limits to support periodic reviews and audit trails.
3. Regular reviews of procedures and limits at least once a year, or as needed, based on risk characteristics and business developments.
4. Comprehensive limit setting, covering the overall risk limit, limits by risk type, and limits by the Bank's functional activities, including risk limits by region/counterparty country.

Proposed risk limits are submitted by the relevant operational units and subsequently reviewed by the Risk Management Unit before approval by the Board of Directors through the Risk Management Committee.

### RISK MANAGEMENT PROCESS ADEQUACY

BSI implements a comprehensive risk management process covering risk identification, measurement, monitoring, and control, supported by an adequate risk management information system. The Bank manages all risks related to its business activities in an integrated manner in accordance with regulatory requirements, including credit, operational, liquidity, market, legal, compliance, reputational, strategic, rate of return, and investment risks.

#### 1. Risk Identification

The Bank identifies inherent risks across all activities, including emerging risks and sharia risk. Risk identification covers all products and business activities and is conducted periodically using established methods and systems. For new products and activities, risk identification ensures that adequate risk management has been applied prior to launch.

#### 2. Risk Measurement

Risk measurement is conducted periodically for products, portfolios, and all business activities, using quantitative and qualitative methods in line with regulatory models or those developed by the Bank. Assumptions, data sources, procedures, and systems are reviewed at least quarterly or as needed in

response to business or external changes. The Bank adjusts measurement systems for material changes, applies required regulatory reporting standards, conducts independent model validation, evaluates measurement systems regularly, and performs periodic stress testing. Stress testing results are reviewed and used as input for setting or revising risk policies and limits.

#### 3. Risk Monitoring

The Bank monitors and evaluates material risk exposures and their impact on capital through structured monitoring and reporting. Monitoring systems cover risk exposure levels, risk tolerance, compliance with internal limits, stress testing results, and consistency with established policies and procedures. Reporting processes are adjusted for material changes, supported by effective backup systems that are periodically tested. Each work unit is responsible for monitoring risk exposures within its scope.

#### 4. Risk Control

The Bank implements adequate risk control systems aligned with approved policies and procedures. Risk control measures are applied in accordance with the level of exposure, risk appetite, risk tolerance, and sharia principles.

#### 5. Risk Management Information System

The Bank develops a risk management information system that provides information on overall and risk-specific exposures e, compliance with policies, procedures, and limits, as well as the realization of risk management implementation compared with established targets.

## RISK MANAGEMENT

10. Ongoing verification and periodic review of the handling of identified weaknesses and corrective actions taken by the Bank.

Periodic reviews and evaluations are conducted at least annually by the Risk Management Unit and Internal Audit Unit. The frequency of reviews may be increased in line with changes in risk exposure, market conditions, and risk measurement and management methods.

### RISK PROFILE AND ITS MANAGEMENT

BSI has established measures to manage various risks that may arise from the Bank's business activities. The risk management system is developed to support business processes in line

with prudential principles. Risk management covers the following risks:

1. Credit Risk
2. Market Risk
3. Liquidity Risk
4. Operational Risk
5. Legal Risk
6. Compliance Risk
7. Reputational Risk
8. Strategic Risk
9. Investment Risk
10. Return Risk

### CREDIT RISK AND INVESTMENT RISK

Credit risk and investment risk may arise from various Bank business activities, including fund provision, securities, acceptances, interbank transactions, trade financing, foreign exchange transactions, and commitment and contingency obligations. Credit risk may also result from the concentration of fund provision to a single debtor or group of debtors, geographic areas, products, types of financing, or specific business sectors.

In managing these risks, BSI has established a credit and investment risk management organizational structure to ensure financing activities are conducted in accordance with prudential principles. The Bank applies three organizational pillars in the financing process:

- First pillar: Business units in charge of business initiation.
- Second pillar: Risk assessment units in charge of analyzing financing risk.
- Third pillar: Financing operation units in charge of ensuring independent financing disbursement processes.

In addition, the Bank has established a recovery unit responsible for handling non-performing financing. This unit operates independently from the business units and risk assessment units that originate financing.

The Bank formulates financing policies and procedures to support sound financing management in line with prudential principles and sharia principles. These policies and procedures include the Risk Management Policy, Financing Policy, Financing Business Standard Procedures, Portfolio Guideline Business Standard Procedures,

## RISK MANAGEMENT

Product Manuals, and Operational Technical Guidelines for each financing segment.

The Bank also establishes internal limits such as in-house Legal Lending Limits (LLL), credit lines, financing approval authority, industry sector portfolios, and investment portfolio limits for securities. At the transactional level, the Bank sets approval authority limits for financing, including investments in securities. The Bank establishes procedures for determining credit risk limits in accordance with its risk appetite and risk tolerance.

More specifically, the Bank manages credit risk through the following measures:

- a. Financing Expansion Direction  
Financing expansion refers to the Portfolio Guideline, which includes:
  - 1) Industry Class  
The Bank manages financing risk by defining target industry sector classifications. Industry classes are grouped into four categories: attractive, neutral, selective, and watchlist. of the 92 classified industry sectors, financing is directed to sectors categorized as attractive and neutral.
  - 2) Industry Limit  
To manage portfolio concentration risk, the Bank sets financing portfolio limits for each industry sector based on the respective industry class criteria.
  - 3) Industry Acceptance Criteria  
The Bank establishes Industry Acceptance Criteria as an initial process to determine target prospective customers within an industry sector, based on critical quantitative and qualitative factors of each sector. These qualitative criteria include five main aspects, namely: management, technical, financial, marketing, and legal aspects.
- b. Determination of Customer Acquisition and Risk Measurement Methods  
The Bank applies acquisition methods through the originating system, Risk Acceptance Criteria, retail financing scoring, and financing risk ratings for SME financing above Rp1.5 billion and wholesale financing.
- c. Early Warning System  
The Bank used supporting tools such as watchlist tools, both general and sectoral watchlists, to detect customer conditions at an early stage. This enabled the Bank to determine account strategies, including collection, recovery, or restructuring activities.

The system also included portfolio alerts to monitor the performance of the financing portfolio and ensure alignment with the risk limits established by the Bank internally as well as by the regulator.

- d. Development of Rescue Tools  
The Bank develops rescue tools to monitor actions taken on non-performing financing, aimed at minimizing potential losses and recovering financing extended to customers with viable business prospects, performance, repayment capacity, and good faith.
- e. Stress Testing  
The Bank conducts periodic and ad hoc stress testing on extreme yet plausible conditions to anticipate adverse impacts from external changes, including macroeconomic developments that may affect financing performance.
- f. Determination of Financing Tenor  
The Bank determines financing tenors by considering the type of financing, rate of return, liquidity, and potential risks.
- g. Evaluation of Risk Limit Adequacy  
The Bank regularly reviews and evaluates the adequacy of risk limits to ensure alignment with operational needs and regulatory requirements including counterparty risk limit per region/country.
- h. Internal Control System  
The Bank establishes an internal control system integrated into financing systems and procedures to ensure effective risk management.

To integrate data in credit risk management, the Bank operates a Management Information System (MIS) that provides credit risk management data. The Bank reports credit risk exposure on a regular basis for both internal and external purposes.

## RISK MANAGEMENT

### MARKET RISK

BSI is exposed to market risk arising from treasury and investment activities, including securities, money market instruments, foreign exchange (forex), and gold products due to gold inventory holdings. Market risk management aims to minimize the adverse impact of market variable movements on the Bank's portfolio.

BSI applies the segregation of duties principle by separating front office, middle office, and back-office functions in securities and forex transactions:

- a. **Front Office**  
Business units or the treasury unit perform the front office function as transaction executors, serving as the first line of defense and directly conducting treasury transactions.
- b. **Middle Office**  
The risk management unit performs the second line of defense, responsible for reviewing risk limits, measuring risk, and monitoring market risk exposure.
- c. **Back Office**  
Operational units perform the back-office function by carrying out transaction settlement and recording.

BSI also establishes policies, procedures, and limits as guidelines for market risk management, including the Risk Management Policy, Treasury Policy, Treasury and International Banking Business Standard Procedures, Asset and Liability PTO, Market Liquidity Risk Tools PTO, and other market risk management provisions.

### Interest Rate Benchmark Risk

In managing interest rate benchmark risk, BSI undertakes the following measures:

- a. **Risk Identification**  
Identification is conducted on the Bank's products and activities to identify the existence and sources of interest rate benchmark risk. The objective is to control and minimize risk. The identification results are also used to provide recommendations to business units and management.

- b. **Risk Measurement**

Risk measurement is carried out using two methods, namely the Standard method and an internal method, Value at Risk (VaR). VaR represents the maximum potential loss resulting from movements in securities yields under normal market conditions.

- c. **Risk Exposure Monitoring**

Risk exposure is monitored on a daily, weekly, and monthly basis through the Bank's treasury system.

- d. **Risk Control**

Risk control is implemented through the establishment of trading limits for securities. In the event of unrealized losses due to declines in market prices of securities, the Bank may execute sales or cut-loss actions in accordance with established mechanisms to avoid greater losses. Market pricing of trading securities is conducted daily using prices from independent sources.

### Exchange Rate Risk

BSI manages exchange rate risk through the following measures:

1. **Risk Identification**  
Risk identification is conducted on the Bank's products and activities to identify the existence and sources of foreign exchange risk, with the objective of controlling and minimizing such risk.
2. **Risk Measurement**  
Risk measurement is performed using the Value at Risk (VaR) tool. The Bank also maintains its Net Open Position (NOP) within the established limits.

## RISK MANAGEMENT

3. Risk Exposure Monitoring  
Risk exposure is monitored on a daily, weekly, and monthly basis through the Bank's treasury system.
4. Risk Control  
Risk control is carried out through the establishment of limits and the balancing of foreign exchange positions (squaring position).

BSI manages gold price movement risk through the following measures:

1. Risk Identification  
Risk identification is conducted on the Bullion products and activities and gold related business and activities
2. Risk Measurement  
Risk measurement is conducted using the Value at Risk (VaR) tool. The Bank also maintains its gold stock within limits.
3. Risk Exposure Monitoring  
Risk exposure is monitored on a daily basis.
4. Risk control  
Risk control is carried out through the establishment of limits and selling (squaring position) gold to counterparty

The Bank also conducts stress testing to assess its resilience in facing crisis conditions and to prepare the necessary strategies should a crisis occur. On a regular basis, the Bank performs market risk stress testing including gold to evaluate its ability to withstand changes in economic indicators.

In developing its Risk Management Information System, BSI operates a Treasury Core System that provides data for market risk measurement. The Bank routinely reports market risk management exposure to both internal and external parties.

### Management of Trading Book and Banking Book Portfolios and Valuation Methodology

- a. Trading Book  
The trading book portfolio is managed in accordance with established limits and regulatory requirements. The Bank performs daily mark-to-market valuation of trading instrument using market prices obtained from independent sources, such as the Indonesia Securities Pricing Agency, Bloomberg, or Reuters.

- b. Banking Book  
Market risk in the banking book refers to the risk of declining profitability and economic value of capital resulting from changes in market yield levels and foreign exchange rates. Market risk management for the banking book is carried out through periodic reviews of asset and liability pricing to ensure optimal returns.

## LIQUIDITY RISK

BSI manages liquidity risk to ensure sufficient fund availability to meet the Bank's obligations. Liquidity risk may arise from financing activities, treasury and investment operations, as well as funding activities and the issuance of securities. Liquidity risk is categorized into two main categories:

- a. Funding Liquidity Risk  
This risk arises when the Bank is unable to liquidate its assets or obtain funding from other sources. The inability to generate sufficient cash flows, which may lead to liquidity risk, can result from:
  - 1) The inability to generate cash flows from earning assets, including the sale of liquid assets.
  - 2) The inability to generate cash flows from fund mobilization, interbank transactions, and borrowings.
- b. Market Liquidity Risk  
This risk occurs when the Bank is unable to close certain positions at prevailing market prices due to insufficient market liquidity or market disruptions.

In managing liquidity risk, BSI applies the segregation of duties principle, as follows:

- a. Front Office: Treasury unit as the transaction executor.
- b. Middle Office: Risk management unit tasked with conducting limit reviews and risk measurements.
- c. Back Office: Operational unit tasked with conducting settlement and transaction bookkeeping.

## RISK MANAGEMENT

BSI establishes policies, procedures, and limits as guidelines for liquidity risk management, including the Risk Management Policy, Treasury Policy, Treasury and International Banking Business Standard Procedures, Asset and Liability PTO, Market and Liquidity Risk Tools PTO, and determines the following liquidity indicators/limits:

- Minimum Reserve Requirement (GWM)
- Safety Level
- Core Depositors
- Net Stable Funding Ratio (NSFR)
- Liquidity Coverage Ratio (LCR)
- Liquid Assets to Non-Core Deposits (AL-NCD)
- Liquid Assets to Third Party Funds (AL-DPK)

BSI manages liquidity risk through the following measures:

- a. **Liquidity Risk Identification**  
Identification is conducted on the Bank's products and activities to detect potential liquidity risk.
- b. **Placement of Funds in High-Quality Liquid Assets**  
The Bank places funds in high-quality liquid assets as liquidity reserves.
- c. **Liquidity Ratios Measurement**  
The Bank measures liquidity ratios, including cash flow projections, liquidity gap, LCR, NSFR, NSFR and other liquidity ratios.
- d. **Maintaining Access to the Sharia Interbank Money Market**  
The Bank ensures access to the sharia interbank money market to support liquidity.
- e. **Liquidity Risk Stress Testing**  
The Bank conducts liquidity risk stress tests periodically to assess the adequacy of liquidity in facing changes in economic indicators, including the preparation of a recovery plan.
- f. **Determination of Liquidity Risk Limits**  
The Bank sets liquidity risk limits in accordance with internal conditions and applicable regulatory requirements.
- g. **Liquidity Ratio Monitoring**  
The Bank regularly monitors liquidity ratios to ensure compliance with established limits.
- h. **Establishment of Early Warning Indicators and Liquidity Contingency Plan (LCP)**  
The Bank establishes early warning indicators and a Liquidity Contingency Plan (LCP) through mechanisms such as the use of money market instruments, sale of securities, adjustment of profit-sharing ratios on funds, and utilization of

Bank Indonesia lending facilities.

- i. **Monitoring External Indicators**

The Bank monitors movements in external indicators, including the USD/IDR exchange rate, government securities yields, market yield levels, gold prices, and current market information.

BSI operates a Management Information System (MIS) that provides data and information for liquidity risk measurement. The Bank periodically reports liquidity risk exposure to both internal and external parties.

Senior Operational Risk Head (SORH), who coordinated the Decentralized Compliance & Operational Risk (DCOR) function at the Head Office and the Regional Business Control (RBC) function across the network through periodic onsite reviews.

### LEGAL RISK

Legal risk is arising from legal claims and/or weaknesses in juridical aspects. ### REPUTATIONAL RISK

Reputational risk may arise from various Bank business activities, including:

- a. Events that may damage the Bank's reputation, such as negative media coverage and customer complaints.
- b. Other factors that may also harm the Bank's reputation, such as a decline in the Bank's performance, weaknesses in corporate governance, violations of business ethics, and legal claims.

To address this risk, the Bank establishes strategies for all activities with significant reputational risk exposure. The Bank also sets communication procedures to respond to negative news or publications and to prevent the dissemination of counterproductive information. In addition, the Bank establishes customer complaint handling procedures and effective media utilization strategies to respond to negative news. As a preventive measure, the Bank has protocols for reputation management during crisis situations. These protocols include a crisis management structure and standard crisis management procedures.

The Bank identifies reputational risk using various information sources, including mass media coverage, public opinion on social media, customer complaints, and customer satisfaction surveys, while also considering the potential losses arising from reputational risk events. To monitor reputational risk, the Bank applies early warning indicators, such as the volume and scope of negative publications and the frequency of customer complaints. Each work unit is required to report incidents within its respective unit that may affect the Bank's image or reputation to the unit responsible for managing communication with stakeholders.

## RISK MANAGEMENT

The Bank establishes mechanisms to implement reputational risk control measures. Reputational risk control is carried out through two main approaches:

- a. Prevention of events that may give rise to reputational risk, through:
  - 1) Follow-up and resolution of customer complaints and legal cases that may increase risk exposure.
  - 2) Strengthening external and internal communication to control potential reputational risk exposure.
  - 3) Regular communication or education to stakeholders to build a positive reputation.
- b. Restoration of the Bank's reputation following the occurrence of reputational risk events, covering all Bank responses aimed at restoring reputation and preventing further deterioration.

### STRATEGIC RISK

Strategic risk may arise from various factors, including weaknesses in the strategic formulation process, inappropriate strategy formulation, inadequate management information systems, insufficient analysis of the internal and external environment, overly aggressive strategic objectives, improper strategy implementation, and failure to anticipate changes in the business environment.

To address this risk, the Bank establishes adequate procedures to identify and respond to changes in the business environment. In addition, the Bank sets general strategic risk limits, including limits on deviations from established business targets, such as:

- Budget deviation limits,
- Deviation limits on target timelines for achieving or completing strategic initiatives.

The Bank identifies strategic risk using data from regulators, mass media, and reports on the achievement of business targets and work unit performance. Risk analysis is conducted on strategies that require substantial resources and/or carry high risk, such as market entry strategies or diversification strategies in products and services.

The Bank also identifies and records deviations resulting from the implementation of business strategies or business plans that are not realized or are ineffective, particularly those with a significant impact on the Bank's capital. In addition, the Bank records and administers experiences and deviations in the implementation of strategic plans. To maintain its competitive position within the industry, the Bank periodically evaluates its performance. Strategic risk control is carried out through performance reviews of business realization.

### RETURN RISK

Return risk arises primarily from changes in the behavior of the Bank's third-party fund customers due to shifts in expectations regarding the returns provided by the Bank. These expectation changes may be driven by internal factors, such as a decline in the Bank's asset value, and/or external factors, including higher returns offered by other banks. Such changes may trigger fund migration from the Bank to competitors. Return risk management aims to minimize changes in customer behavior by managing return levels to remain competitive with the market.

The Bank establishes strategies for activities with significant return risk exposure by considering:

- a. Economic and market conditions and their impact on the Bank's return risk.
- b. The Bank's capability to generate profits in specific markets and its ability to identify, monitor, and control return risk.
- c. The Bank's portfolio mixes and diversification.

The Bank sets policies and procedures for return risk management covering asset and liability management organization, asset and liability composition, and risk measurement. These include procedures to assess mismatches between assets and liabilities based on repricing timing for financing returns and third-party funds, along with the related mechanisms. The Bank also sets limits to manage return risk consistently, including limits on the concentration of funding sources, instruments, market segments, or specific return levels.

## RISK MANAGEMENT

Return risk exposure is monitored on an ongoing basis, including potential declines in return income, through gross revenue reports, evaluation of net return income against targets, and other relevant management reports.

A Recovery Plan is a structured plan designed to address potential financial stress that may affect Bank Syariah Indonesia. The Bank has established a Recovery Plan that includes defined trigger levels and Recovery Options to prevent, restore, and improve financial conditions, as well as to safeguard business continuity in the event of financial stress.

The Recovery Plan is reviewed and updated annually. In addition to fulfilling regulatory requirements, this ensures that the Recovery Plan remains aligned with current conditions and continues to serve as an effective guide when the Bank encounters financial stress.

## RISK MANAGEMENT

**RISK MANAGEMENT IMPLEMENTATION EVALUATION**

The Bank conducts a Risk Maturity Index (RMI) assessment, which is an index used to measure the quality level of the design and effectiveness of Risk Management implementation in creating and protecting the Bank's value. The RMI assessment includes the process of conducting document reviews, surveys and post mortem analysis, interviews, as well as assessment and reporting. The RMI consists of 2 aspects, namely the dimension aspect and the performance aspect, where the dimension aspect consists of five different dimensions that serve as the reference in the RMI assessment.

Based on the results of the 2024 RML assessment conducted in 2025, the Bank was at Level 3.9 (Better Practice Phase), indicating that the Company has implemented all dimensions of strong Risk Management practices and is approaching or aligned with the global standard practices of its industry.

**STATEMENT OF THE BOARD OF DIRECTORS AND/OR BOARD OF COMMISSIONERS OR AUDIT COMMITTEE ON THE ADEQUACY OF THE RISK MANAGEMENT SYSTEM**

## SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

For BSI, sustainability is a mandate to create balanced value between economic growth, social welfare, and environmental stewardship. Through the integration of ESG principles and Islamic values, BSI continues to strengthen its contribution to building an inclusive and sustainable Islamic economic ecosystem

# INTRODUCTION TO SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

As the largest Islamic bank in Indonesia, PT Bank Syariah Indonesia Tbk (BSI) views sustainability as an integral part of its responsibility in conducting business activities. For BSI, sustainability is not solely about achieving economic performance, but also reflects the Bank's commitment to creating broader value for society and the environment through responsible Islamic banking practices.

Aligned with Islamic principles that emphasize balance between economic growth, social well-being, and environmental stewardship, BSI integrates Environmental, Social, and Governance (ESG) considerations into its business strategy, risk management framework, and product and service development. This approach enables the Bank to support inclusive economic growth while strengthening its contribution to sustainable development in Indonesia.

Throughout 2025, BSI continued to strengthen the implementation of sustainable finance through the expansion of green and social financing portfolios, the advancement of environmentally responsible operational practices, and the implementation of community empowerment programs that deliver tangible benefits to stakeholders. These initiatives reflect BSI's strategic role in developing a sustainable Islamic economic ecosystem while supporting Indonesia's broader development agenda.

More detailed information regarding the Bank's sustainability strategy, policies, governance, and performance is presented in the BSI Sustainability Report 2025, which is published separately.

## SUSTAINABILITY POLICY AND COMMITMENT

BSI places sustainability as an integral component of its business strategy and corporate governance. This commitment is implemented through the adoption of sustainable finance principles in alignment with Financial Services Authority Regulation (POJK) No. 51/POJK.03/2017 on the Implementation of Sustainable Finance for Financial Institutions, Issuers, and Public Companies. Through this regulatory framework, the Bank seeks to ensure that its business activities not only support economic growth but also consider long-term social and environmental impacts.

In practice, BSI integrates ESG considerations into various policies and decision-making processes. This commitment is reflected in the strengthening of sustainability governance, the development of ESG-related policies and procedures, and the establishment of oversight structures that support the management of sustainability-related risks and opportunities. This approach enables the Bank to identify, manage, and mitigate environmental and social risks associated with both its operations and financing portfolio.

Furthermore, BSI aligns its sustainable finance implementation with the Bank's strategic planning through the development of the Sustainable Finance Action Plan (RAKB), which is periodically updated. Through this framework, the Bank establishes the direction for expanding its sustainable financing portfolio, strengthening ESG governance, and enhancing internal capabilities to support the consistent and measurable implementation of its sustainability strategy.

## STRATEGY AND PILLARS OF SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

In implementing its sustainability commitment, BSI adopts an integrated approach that positions sustainability as an essential element of its long-term business development. This strategy is designed to ensure that the Bank's business activities not only generate economic value but also create positive contributions for society and the environment.

BSI's social and environmental responsibility framework is structured around three core sustainability pillars that guide the development of the Bank's programs and initiatives: Sustainable Banking, Sustainable Operations, and Sustainable Beyond Banking. These pillars reflect the Bank's comprehensive approach to integrating sustainability principles into its business activities, operational practices, and social contributions to the community.

Through the Sustainable Banking pillar, BSI focuses on strengthening the implementation of sustainable finance by developing products and financing portfolios that deliver social and environmental benefits. The Sustainable Operations pillar emphasizes efforts to improve operational efficiency while managing the environmental impact of the Bank's operations. Meanwhile, the Sustainable Beyond Banking pillar reflects BSI's commitment to delivering broader social impact through community empowerment programs and the development of the Islamic economic ecosystem.

Together, these three pillars serve as the strategic foundation for BSI's sustainability initiatives and reinforce the Bank's role in supporting sustainable development in Indonesia.

# PROGRAM IMPLEMENTATION BY PILLAR

In implementing its sustainability commitment, BSI carries out its social and environmental responsibility programs through three main pillars: Sustainable Banking, Sustainable Operations, and Sustainable Beyond Banking. These pillars serve as the implementation framework to ensure that sustainability principles are embedded across the Bank's business activities, operational practices, and social contributions to the community.

Through this approach, BSI seeks to strengthen its role as an Islamic financial institution that not only supports economic growth but also delivers positive impacts for the environment and society. Programs implemented under each pillar are designed to advance sustainable finance, improve environmentally responsible operational practices, and promote inclusive community empowerment.

## SUSTAINABLE BANKING

Through the Sustainable Banking pillar, BSI strengthens its role as an Islamic financial institution that advances sustainable finance through the development of financing portfolios that deliver economic, social, and environmental benefits. This approach is implemented by integrating sustainability principles into product development, financing portfolio management, and business decision-making processes.

Throughout 2025, BSI continued to expand the distribution of sustainable financing, encompassing both green and social financing across sectors that support sustainable development. The Bank's sustainable financing portfolio reached Rp73.92 trillion, consisting of Rp15.66 trillion in green financing and Rp58.26 trillion in social financing, including financing for electric vehicles and business activities that contribute to improving community welfare.

The Bank also strengthened its sustainable funding sources through the issuance of Sustainability Sukuk, which supports the financing of projects that generate positive environmental and social impacts. In parallel, the integration of ESG considerations in financing activities continues to be enhanced through strengthened policies, sustainability risk assessments, and the development of responsible financing frameworks.

Through these initiatives, BSI aims to reinforce its contribution to inclusive economic growth while expanding the positive impact of Islamic finance on sustainable development.

### Hal audit Utama (lanjutan)

Kami telah memenuhi tanggung jawab yang diuraikan dalam paragraf Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan pada laporan kami, termasuk sehubungan dengan hal audit utama yang dikomunikasikan di bawah ini. Oleh karena itu, audit kami mencakup pelaksanaan prosedur yang didesain untuk merespons penilaian kami atas risiko kesalahan penyajian material dalam laporan keuangan terlampir. Hasil prosedur audit kami, termasuk prosedur yang dilakukan untuk merespons hal audit utama di bawah ini, memberikan dasar bagi opini audit kami atas laporan keuangan terlampir.

#### Penyisihan kerugian penurunan nilai atas aset-aset keuangan

##### Penjelasan atas hal audit utama:

Seperti yang dijelaskan dalam Catatan 9,10 dan 11 atas laporan keuangan terlampir, pada tanggal 31 Desember 2025, total aset-aset keuangan Bank yang disajikan sebagai piutang, pinjaman qardh dan pembiayaan adalah sebesar Rp314,98 triliun dengan penyisihan kerugian penurunan nilai terkait sebesar Rp10,98 triliun.

Dalam mengestimasi jumlah penyisihan kerugian penurunan nilai atas aset-aset keuangan tersebut di atas, Bank menggunakan model keuangan yang kompleks berdasarkan asumsi-asumsi utama yang ditentukan dengan tingkat pertimbangan dan estimasi yang signifikan dari manajemen.

Penyisihan penurunan nilai aset-aset keuangan ini adalah hal audit utama bagi kami karena total aset-aset keuangan ini setelah dikurangi penyisihan penurunan nilai mewakili 67% dari total aset Bank adalah material bagi laporan keuangan terlampir dan proses estimasinya memerlukan pertimbangan dan estimasi signifikan dari manajemen.

### Key audit matters (continued)

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Financial Statements paragraph of our report, including in relation to the key audit matter communicated below. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the accompanying financial statements. The results of our audit procedures, including the procedures performed to address the key audit matter below, provide the basis for our opinion on the accompanying financial statements.

#### Allowance for impairment losses of financial assets

##### Description of the key audit matter:

As described in Notes 9, 10 and 11 to the accompanying financial statements, as of December 31, 2025, the Bank's financial assets presented as receivables, funds of qardh and financing was totaling Rp314.98 trillion and the related allowance for impairment losses was amounting to Rp10.98 trillion.

In estimating the allowance for impairment losses on the aforementioned financial assets, the Bank utilized a complex financial model involving key assumptions that required significant management judgment and estimates.

The allowance for impairment losses on these financial assets is a key audit matter for us, as these financial assets deducted by allowance for impairment losses represent 67% of the Bank's total assets, is material to the accompanying financial statements, and its estimation process involves significant management's judgment and estimates.

##### Respons audit:

Kami mengevaluasi dan menguji rancangan dan efektivitas pengendalian utama atas proses pemberian aset-aset keuangan ini, segmentasi, penilaian kualitasnya dan penilaian internal secara regular, serta pencatatan dan pengawasannya. Kami memperoleh pemahaman atas metodologi dan model keuangan yang digunakan untuk mengestimasi penyisihan penurunan nilai atas aset-aset keuangan ini, serta melakukan validasi atas data masukan, dasar dan asumsi utama yang digunakan dalam model keuangan tersebut dengan membandingkan ke data historis Bank. Kami juga menguji bukti objektif adanya penurunan nilai dengan mereview kondisi-kondisi yang mencerminkan pemburukan risiko kredit baik secara portfolio kolektif maupun pembiayaan individual.

Kami melakukan evaluasi atas perhitungan hari tunggakan atas seluruh aset-aset keuangan ini dan rasio realisasi bagi hasil terhadap proyeksi bagi hasil atas seluruh pembiayaan mudharabah dan musyarakah dan menilai kolektibilitasnya berdasarkan sampel sesuai dengan Peraturan Otoritas Jasa Keuangan (POJK) No. 2/POJK.03/2022 "Penilaian Kualitas Aset Bank Umum Syariah dan Unit Usaha Syariah". Kami juga menguji konsistensi antara pengalaman historis kerugian pembiayaan dan kondisi kualitas portfolio sekarang dibandingkan dengan kerugian terkini pada portfolio pembiayaan.

##### Allowance for impairment losses of financial assets (continued)

##### Audit response:

We evaluated and assessed the design and operating effectiveness of key controls over the origination of these financial assets, and their segmentation, regular internal assessment of quality, and recording and monitoring. We gained understanding over methodologies and financial model used to estimate the allowance for impairment loss of these financial assets, and validated inputs, bases, and key assumptions used in the financial model by comparing to the Bank's historical data. We also tested the objective evidence of impairment by reviewing conditions that reflect the deterioration of credit risk both for collective portfolio and individual financing.

We reviewed the calculation of days past due for the population of these financial assets as well as profit sharing realization to projected profit sharing ratio for mudharabah and musyarakah financing and assess their collectability on sampling basis based on the prevailing Financial Services Authority Regulation (POJK) No. 2/POJK.03/2022 "Asset Quality Ratings for Sharia Bank and Sharia Business Unit". We also assessed consistency of historical financing loss experience and the current financing quality circumstances compared with recent losses in the financing portfolios.

Untuk aset-aset keuangan tersebut yang diidentifikasi mengalami penurunan nilai, kami menilai kelayakan asumsi-asumsi utama atas arus kas masa depan yang akan diterima dari kegiatan operasi, termasuk nilai jaminan yang dapat direalisasikan berdasarkan informasi pasar yang tersedia atau penilaian yang dilakukan baik oleh pakar manajemen atau manajemen.

Atas dasar sampel, kami menguji akurasi perhitungan matematis pada model keuangan tersebut di atas dan menilai kecukupan pengungkapan atas penyisihan penurunan nilai dari aset-aset keuangan ini pada laporan keuangan terlampir. Kami melibatkan pakar auditor kami dalam melakukan prosedur-prosedur di atas sesuai dengan keahliannya.

#### Allowance for impairment losses of financial assets (continued)

#### Audit response: (lanjutan)

On sample basis, for individually provided allowance for impairment losses of these financial assets, we assessed if timely identification was made for exposures with significant deterioration in credit quality or exposures which have been impaired. Of these financial assets identified to be impaired, we assessed key assumptions on the expected future cash flows from operating activities, including the value of realizable collateral based on available market information or valuation prepared by either the management's expert or the management.

We tested mathematical accuracy of the calculation of allowance for impairment on a sample basis and we assessed the adequacy of disclosures for these matters in the notes to the accompanying financial statements. We involved our auditor's experts in the performance of these procedures in accordance with their specific expertise.

Tanggung jawab auditor terhadap audit atas laporan keuangan

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor independen yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit yang ditetapkan oleh IAPI akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya suatu kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian atas pengendalian internal.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing established by the IICPA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to such risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or override of internal control.

- Memeroleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Bank.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Bank untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor independen kami ke pengungkapan terkait dalam laporan keuangan atau, jika pengungkapan tersebut tidak memadai, memodifikasi opini kami. As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our independent auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Laporan No. 00021/2.1505/AU.1/07/0242-1/1/II/2026 (lanjutan)

Tanggung jawab auditor terhadap audit atas laporan keuangan (lanjutan)

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga: (lanjutan)

- Mengevaluasi penyajian, struktur, dan isi laporan keuangan secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan kepada pihak tersebut seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

## Independent Auditor's Report (continued)

Report No. 00021/2.1505/AU.1/07/0242-1/1/II/2026 (continued)

Auditor's responsibilities for the audit of the financial statements (continued)

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also: (continued)

- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

**Tanggung jawab auditor terhadap audit atas  
laporan keuangan (lanjutan)**

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal-hal tersebut yang paling signifikan dalam audit atas laporan keuangan periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama tersebut dalam laporan auditor independen kami kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal audit utama tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal audit utama tidak boleh dikomunikasikan dalam laporan auditor independen kami karena konsekuensi yang merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

**Auditor's responsibilities for the audit of the  
financial statements (continued)**

*From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe such key audit matters in our independent auditor's report unless laws or regulations preclude public disclosure about such key audit matters or when, in extremely rare circumstances, we determine that a key audit matter should not be communicated in our independent auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.*

The Bank calculates individual allowance for impairment losses for *murabahah* receivable in accordance with SFAS 402 "Accounting for *Murabahah*", IFAS 402 "Impairment of *Murabahah* Receivables", and PAPS I Revised 2013.

The Bank assesses whether there is any objective evidence that a financial asset is impaired at each statement of financial position date.

Financial assets are impaired when an objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset and that the loss event has an impact on the future cash flows of the financial asset that can be estimated reliably.

- (1) significant financial difficulty of the issuer or obligor;
- (2) a breach of contract, such as a default or arrears on principal or margin payments;
- (3) the lender, for economic or legal reasons relating to the debtor's financial difficulty, grants the debtor a concession that the lender would not otherwise consider;

**d. Cadangan kerugian penurunan nilai (lanjutan)**

Piutang *murabahah* (lanjutan)

Kriteria yang digunakan oleh Bank untuk menentukan bukti objektif dari penurunan nilai adalah sebagai berikut: (lanjutan)

- (4) terdapat kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya;
- (5) hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan;
- (6) data yang dapat diobservasi mengindikasikan adanya penurunan yang dapat diukur atas estimasi arus kas masa datang dari kelompok aset keuangan sejak pengakuan awal aset dimaksud, meskipun penurunannya belum dapat diidentifikasi terhadap aset keuangan secara individual dalam kelompok aset tersebut;
- (7) memburuknya status pembayaran pihak peminjam dalam kelompok tersebut; dan
- (8) kondisi ekonomi nasional atau lokal yang berkorelasi dengan wanprestasi atas aset dalam kelompok tersebut.

Bank pertama kali menentukan apakah terdapat bukti objektif penurunan nilai secara individual atas aset keuangan yang signifikan dan secara kolektif untuk aset keuangan yang tidak signifikan secara individual.

Jika Bank menentukan tidak terdapat bukti objektif mengenai penurunan nilai atas aset keuangan yang dinilai secara individual, terlepas aset keuangan tersebut signifikan atau tidak, maka Bank memasukkan aset tersebut ke dalam kelompok aset keuangan yang memiliki karakteristik risiko pembiayaan yang serupa dan menilai penurunan nilai kelompok tersebut secara kolektif. Aset keuangan yang penurunan nilainya dilakukan secara individual, dan untuk itu kerugian penurunan nilai telah diakui atau tetap diakui, tidak termasuk dalam penilaian penurunan nilai secara kolektif.

Bank menetapkan piutang *murabahah* yang harus dievaluasi penurunan nilainya secara individual, jika memenuhi salah satu kriteria di bawah ini:

- (1) piutang *murabahah* memiliki kolektibilitas kurang lancar, diragukan dan macet, dan memiliki saldo nilai piutang secara individual di atas atau sama dengan Rp10.000; atau

- (5) *the disappearance of an active market of financial assets due to financial difficulties;*
- (6) *observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified individually in the portfolio;*
- (7) *adverse changes in the payment status of debtors in the portfolio; and*
- (8) *national or local economic conditions that correlate with breach of contract of the assets in the portfolio.*

*The Bank first assesses whether an objective evidence of impairment for financial assets that are individually significant and collectively for financial assets that are not individually significant.*

*If the Bank determines that there is no objective evidence of impairment for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar financing risk characteristics and collectively assesses them for impairment. Financial assets that are individually assessed for impairment, and for which an impairment loss is or continues to be recognised is excluded in the collective assessment of impairment.*

*The Bank determines *murabahah* receivables to be evaluated for impairment through individual evaluation if one of the following criteria is met:*

- (1) **murabahah* receivables which have collectibility status as substandard, doubtful and loss, and have an individual receivables balance of above or equal to Rp10,000; or*

Piutang murabahah (lanjutan)

Bank menetapkan piutang *murabahah* yang harus dievaluasi penurunan nilainya secara kolektif, jika memenuhi salah satu kriteria di bawah ini:

- (1) piutang *murabahah* yang secara individual memiliki nilai signifikan namun tidak memiliki bukti objektif penurunan nilai;
- (2) piutang *murabahah* yang secara individual memiliki nilai tidak signifikan; atau
- (3) piutang *murabahah* yang direstrukturisasi yang secara individual memiliki nilai tidak signifikan.

Perhitungan cadangan kerugian penurunan nilai atas aset keuangan yang dinilai secara kolektif dikelompokkan berdasarkan karakteristik risiko piutang yang sama dengan mempertimbangkan segmentasi piutang berdasarkan pengalaman kerugian masa lalu (*probability of default*).

Bank menggunakan metode analisis migrasi yang merupakan suatu metode analisis statistik, untuk menilai cadangan kerugian penurunan nilai atas piutang yang diberikan secara kolektif. Bank menggunakan data historis 5 (lima) tahun dalam menghitung *Probability of Default* ("PD") dan *Loss Given Default* ("LGD").

Kerugian penurunan nilai atas aset keuangan yang dicatat pada biaya perolehan diamortisasi diukur sebesar selisih antara nilai tercatat aset keuangan dengan nilai kini estimasi arus kas masa datang yang didiskonto menggunakan tingkat margin efektif awal dari aset keuangan tersebut.

Kerugian yang terjadi diakui pada laporan laba rugi dan penghasilan komprehensif lain dan dicatat pada akun cadangan kerugian penurunan nilai sebagai pengurang terhadap aset keuangan yang dicatat pada biaya perolehan diamortisasi.

Penerimaan kembali atas aset keuangan yang diberikan yang telah dihapusbukukan, pada tahun berjalan dikreditkan dengan menyesuaikan akun cadangan kerugian penurunan nilai. Penerimaan kembali atas pinjaman yang diberikan yang telah dihapusbukukan pada tahun-tahun sebelumnya dicatat sebagai pendapatan operasional selain pendapatan margin.

**2. MATERIAL ACCOUNTING POLICIES (continued)**

**d. Allowance for impairment losses (continued)**

Murabahah receivables (continued)

The Bank determines *murabahah* receivables to be evaluated for impairment through collective evaluation if one of the following criteria is met:

- (1) *murabahah* receivables which individually have significant value but there is no objective evidence of impairment;
- (2) *murabahah* receivables which individually have insignificant value; or
- (3) restructured *murabahah* receivables which individually have insignificant value.

The calculation of allowance for impairment losses on financial assets which are evaluated collectively, grouped based on similar receivable risk characteristics and taking into account the receivable segmentation on the basis of historical loss experience (*probability of default*).

The Bank uses the migration analysis method which is a statistical model analysis method to assess allowance for impairment losses on collective receivables. The Bank uses 5 (five) years historical data to compute for the *Probability of Default* ("PD") and *Loss Given Default* ("LGD").

Impairment losses on financial assets recorded at amortised cost are measured as the difference between the carrying amount of the financial assets and present value of estimated future cash flows discounted at the financial assets original effective margin rate.

Impairment losses are recognised in statements of profit or loss and other comprehensive income and reflected in an allowance for impairment losses account against financial assets carried at amortised cost.

The recoveries of written-off financial assets in the current year are credited by adjusting the allowance for impairment losses accounts. Recoveries of written-off loans from previous years are recorded as operating income other than margin income.

Aset tetap, kecuali tanah, disusutkan sejak bulan ketika aset tersebut digunakan dengan menggunakan metode garis lurus selama taksiran masa manfaat aset sebagai berikut:

|                                                                              | <u>Tahun/Years</u> |

| Instalasi, kendaraan bermotor, inventaris kantor dan renovasi atas aset sewa | 5 <sup>*)</sup>    |

<sup>\*)</sup> 5 tahun atau mengikuti masa manfaat teknis

Nilai sisa aset, masa manfaat dan metode penyusutan ditelaah dan jika perlu disesuaikan, pada setiap akhir periode pelaporan.

Biaya-biaya setelah pengakuan awal diakui sebagai bagian nilai tercatat aset atau sebagai aset yang terpisah, sebagaimana mestinya, hanya jika kemungkinan besar Bank mendapat manfaat ekonomis di masa depan berkenaan dengan aset tersebut dan biaya perolehan aset dapat diukur dengan andal. Nilai tercatat dari komponen yang diganti dihapuskan. Biaya perbaikan dan pemeliharaan dibebankan ke dalam laporan laba rugi dan penghasilan komprehensif lain dalam tahun keuangan ketika biaya-biaya tersebut terjadi.

Kenaikan nilai tercatat yang timbul dari revaluasi tanah dikreditkan pada "selisih revaluasi aset tetap" sebagai bagian dari pendapatan komprehensif lainnya.

Penurunan yang menghapus nilai kenaikan yang sebelumnya atas aset yang sama dibebankan terhadap "selisih revaluasi aset tetap" sebagai bagian dari pendapatan komprehensif lainnya; penurunan lainnya dibebankan pada laporan laba rugi dan penghasilan komprehensif lain.

Nilai tercatat aset segera diturunkan sebesar jumlah yang dapat dipulihkan jika nilai tercatat aset lebih besar dari estimasi jumlah yang dapat dipulihkan.

Apabila aset tetap dilepas, maka nilai harga perolehan dan akumulasi penyusutannya dikeluarkan dari laporan posisi keuangan dan keuntungan atau kerugian bersih atas pelepasan aset tetap diakui pada "pendapatan dan beban nonusaha" dalam laporan laba rugi dan penghasilan komprehensif lain. Jika aset yang direvaluasi dijual, jumlah yang dicatat di dalam ekuitas dipindahkan ke saldo laba.

**2. MATERIAL ACCOUNTING POLICIES (continued)**

**m. Fixed assets, right-of-use assets, and intangible assets (continued)**

**Fixed assets (continued)**

Fixed assets, except land, are depreciated from the month of the usage of assets and computed using the straight-line method based on the estimated useful life of the assets as follows:

|                                                                    | <u>Buildings</u> |
|--------------------------------------------------------------------|------------------|
| Buildings improvement                                              |                  |
| Installation, vehicles, office equipment and leasehold improvement |                  |

<sup>\*)</sup> 5 years or following the technical benefit period

The assets' residual values, useful lives and depreciation method are reviewed and adjusted if appropriate, at the end of each reporting period.

Costs after initial recognition are recognised as part of the carrying amount of the asset or as a separate asset, as appropriate, only when the Bank is likely to benefit economically in the future with respect to these assets and the acquisition cost can be reliably measured. The carrying value of the replaced part are removed from the accounts. All other repairs and maintenance are charged to the statements of profit or loss and other comprehensive income in the financial period when these costs occur.

The increase in the carrying amount arising from revaluation of land is credited to "surplus on fixed assets revaluation" as part of other comprehensive income.

The decrease in the carrying amount that offset previous increase of the same asset is charged to "surplus on fixed assets revaluation" as part of other comprehensive income, other decrease is charged to the statements of profit or loss and other comprehensive income.

The carrying value of asset is immediately impaired to its recoverable amount if the asset's carrying amount is greater than the estimated recoverable amount.

The net gains or losses arising from disposal of the fixed assets are determined by comparing the proceeds received from disposal with the carrying amount of the assets and recognised in "non-operating income and expenses" in the statements of profit or loss and other comprehensive income. When the revalued assets are sold, amounts recorded in equity are transferred to retained earnings.

Bank tidak mengakui aset hak guna dan liabilitas sewa untuk:

- Sewa dengan jangka waktu kurang atau sama dengan 12 bulan dan tidak terdapat opsi beli; dan

Pada tanggal permulaan sewa, Bank mengakui aset hak guna dan liabilitas sewa. Aset hak guna diukur pada biaya perolehan, dimana meliputi jumlah pengukuran awal liabilitas sewa yang disesuaikan dengan pembayaran sewa yang dilakukan pada atau sebelum tanggal permulaan, ditambah dengan biaya langsung awal yang dikeluarkan. Aset hak guna diamortisasi dengan menggunakan metode garis lurus sepanjang jangka waktu sewa.

Liabilitas sewa diukur pada nilai kini pembayaran sewa yang belum dibayar pada tanggal permulaan, didiskontokan dengan menggunakan suku bunga implisit dalam sewa atau jika suku bunga tersebut tidak dapat ditentukan, maka menggunakan suku bunga pinjaman inkremental. To assess whether a contract conveys the right to control the use of an identified asset, the Bank shall assess whether:

- The Bank has the right to obtain substantially all the economic benefit from use of the asset throughout the period of use; and
- The Bank has the right to direct the use of the identified asset. The Bank has the right when it has a relevant decision-making right on how and for what purpose the asset is used are predetermined and:
  1. The Bank has the right to operate the asset; and
  2. The Bank has designed the asset in a way that predetermine how and for what purposes it will be used.

The Bank recognises a right-of-use assets and lease liabilities at the leases commencement date. The right-of-use assets is initially measured at cost, which comprises the initial amount of the lease liabilities adjusted for any leases payment made at or before the commencement date, plus any initial direct cost incurred. The right-of-use assets is amortised over the straight-line method throughout the lease term.

The lease liabilities are initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that right cannot be readily determined, using incremental borrowing rate. Generally, the Bank uses its incremental borrowing rate as a discount rate.

**m. Aset tetap, aset hak guna, dan aset tidak berwujud (lanjutan)**

**Aset hak guna (lanjutan)**

Pembayaran sewa dialokasikan menjadi bagian pokok dan biaya keuangan. Biaya keuangan dibebankan pada laba rugi selama periode sewa sehingga menghasilkan tingkat suku bunga periodik yang konstan atas saldo liabilitas untuk setiap periode.

Jika sewa mengalihkan kepemilikan aset pendasar kepada Bank pada akhir masa sewa atau jika biaya perolehan aset hak guna merefleksikan Bank akan mengeksekusi opsi beli, maka Bank menyusutkan aset hak guna dari tanggal permulaan hingga akhir umur manfaat aset pendasar. Jika tidak, maka Bank menyusutkan aset hak guna dari tanggal permulaan hingga tanggal yang lebih awal antara akhir umur manfaat aset hak guna atau akhir masa sewa.

Biaya yang terkait dengan pemeliharaan perangkat lunak diakui sebagai beban pada saat terjadinya. Biaya pengembangan yang sebelumnya diakui sebagai beban, tidak dapat diakui sebagai aset pada periode berikutnya.

Perangkat lunak diamortisasi sejak bulan ketika aset tersebut digunakan dengan menggunakan metode garis lurus selama taksiran masa manfaat aset yaitu 5 dan 10 tahun.

**2. MATERIAL ACCOUNTING POLICIES (continued)**

**m. Fixed assets, right-of-use assets, and intangible assets (continued)**

**Right-of-use assets (continued)**

Each leases payment is allocated between the liabilities and finance cost. The finance cost is charged to profit or loss over the leases period so as to produce a constant periodic rate of interest on the remaining balance of the liabilities for each period.

If the leases transfers ownership of the underlying asset to the Bank by the end of the leases term or if the cost of the right-of-use assets reflects that the Bank will exercise a purchase option, the Bank depreciates the right-of-use assets from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Bank depreciates the right-of-use assets from the commencement date to the earlier of the end of the useful life of the right-of-use assets or the end of the leases term.

**Intangible assets**

Intangible assets are recognised if, and only if the cost of the asset can be measured reliably and it is probable that the Bank will obtain future economic benefits from the assets. Intangible assets consist of software.

Software acquired by the Bank is recorded at cost less accumulated amortisation. The amortisation method, estimated useful life and residual value are reviewed at the end of each reporting year and adjusted if deemed appropriate.

Directly attributable costs that are capitalised as part of the software product include the software development employee costs and an appropriate portion of relevant overheads.

Costs associated with maintaining computer software programs are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Software are amortised from the month of the usage of assets by computed using the straight-line method based on the estimated useful life of the assets, which is 5 and 10 years.

Current tax expense is provided based on the estimated taxable income for the current year. Deferred tax assets and liabilities are recognised for temporary differences between the financial and the tax bases of assets and liabilities at each reporting date.

Deferred tax assets are recognised for all deductible temporary differences and carry forward of uncompensated tax losses to the extent that it is probable that those temporary differences and carry forward of uncompensated tax losses will be utilised in deducting future taxable profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and is reduced when it is no longer probable that sufficient taxable profits will be available to compensate part or all of the benefit of the deferred tax assets.

Amendment to tax obligation is recorded when an assessment letter is received or, if objected to or appealed against by the Bank, when the result of such appeal or objection is determined. If needed, management will provide provisions based on the estimated amount which will be paid to tax authority.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled based on tax laws that have been enacted or substantively enacted as at statements of financial position dates. The related tax effects of the provisions for and/or reversals of all temporary differences during the year, including the effect of change in tax rates, are recognised as "Income Tax Benefit/(Expense)" and included in the net profit or loss for the year, except to the extent that they relate to items previously charged to other comprehensive income and reported to equity.

Deposito *mudharabah* merupakan simpanan pihak lain yang hanya bisa ditarik pada waktu tertentu sesuai dengan perjanjian antara pemegang deposito *mudharabah* dengan Bank.

Deposito *mudharabah* dinyatakan sebesar nilai nominal sesuai dengan perjanjian antara pemegang deposito dengan Bank.

Dana syirkah temporer tidak dapat digolongkan sebagai liabilitas. Hal ini karena Bank tidak berkewajiban untuk mengembalikan jumlah dana awal dari pemilik dana kecuali akibat kelalaian atau wanprestasi ketika mengalami kerugian.

Di sisi lain dana syirkah temporer tidak dapat digolongkan sebagai ekuitas karena mempunyai waktu jatuh tempo dan pemilik dana tidak mempunyai hak kepemilikan yang sama dengan pemegang saham, seperti hak *voting* dan hak atas realisasi keuntungan yang berasal dari aset lancar dan aset noninvestasi.

Dana syirkah temporer merupakan salah satu unsur laporan posisi keuangan, hal tersebut sesuai dengan prinsip syariah yang memberikan hak kepada Bank untuk mengelola dan menginvestasikan dana, termasuk untuk mencampur dana dimaksud dengan dana lainnya.

On the other hand, temporary syirkah funds cannot also be classified as equity, because of the existence of maturity period and the absence of similar rights of depositors as with shareholders, such as voting rights and the rights to realise gain from current assets and other non-investment assets.

Temporary syirkah funds represent one of the statements of financial position accounts which is in accordance with sharia principles that provide rights to the Bank to manage and invest funds, including mixing of one fund with the other funds.

**ah. Segmen operasi (lanjutan)**

Di tahun 2022, Bank menerapkan perubahan terhadap penyajian segmen operasi yang digunakan dalam laporan kinerja manajemen internal. Bank telah mengidentifikasi dan mengungkapkan informasi keuangan berdasarkan kegiatan bisnis utama (segmen usaha) yang terbagi atas kelompok *Corporate Banking*, *Commercial Banking*, *Hubungan Kelembagaan*, *Ritel*, dan *Treasury Banking & Kantor Pusat*.

**3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING**

Beberapa estimasi dan asumsi dibuat dalam rangka penyusunan laporan keuangan dimana dibutuhkan pertimbangan manajemen dalam menentukan metodologi yang tepat untuk penilaian aset dan liabilitas.

Manajemen membuat estimasi dan asumsi yang berimplikasi pada pelaporan nilai aset dan liabilitas atas tahun keuangan satu tahun ke depan. Semua estimasi dan asumsi yang diharuskan oleh PSAK adalah estimasi terbaik yang didasarkan pada standar yang berlaku. Estimasi dan pertimbangan dievaluasi secara terus menerus dan berdasarkan pengalaman masa lalu dan faktor-faktor lain termasuk harapan atas kejadian yang akan datang.

Walaupun estimasi dan asumsi ini dibuat berdasarkan pengetahuan terbaik manajemen atas kejadian dan aktivitas saat ini, hasil yang timbul mungkin berbeda dengan estimasi dan asumsi semula.

Sumber utama ketidakpastian estimasi:

**a. Cadangan kerugian penurunan nilai pada piutang, pinjaman *qardh*, dan pembiayaan**

Bank menelaah kualitas aset pada setiap tanggal laporan posisi keuangan untuk menilai apakah penurunan nilai harus dicatat dalam laporan laba rugi dan penghasilan komprehensif lain. Dalam menentukan apakah penurunan nilai harus dibentuk dalam laporan laba rugi, Bank membuat estimasi penilaian apakah terdapat indikasi penurunan kualitas aset. Estimasi tersebut didasarkan pada asumsi dari sejumlah aset dan hasil akhirnya mungkin berbeda, yang mengakibatkan perubahan di masa mendatang atas cadangan penurunan nilai.

The Bank has identified and disclosed financial information based on main business (business segment) classified into Corporate Banking, Commercial Banking, Institutional Relation, Retail and Treasury Banking & Head Office.*

**3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS**

*Certain estimates and assumptions are made in the preparation of the financial statements and these require management judgment in determining the appropriate methodology for valuation of assets and liabilities.*

*Management makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. All estimates and assumptions required in conformity with SFAS are best estimates undertaken in accordance with the applicable standard. Estimates and judgments are evaluated on a continuous basis and are based on past experiences and other factors, including expectations with regard to future events.*

*Although these estimates and assumptions are based on management's best knowledge of current events and activities, actual result may differ from those estimates and assumptions.*

*Key sources of estimation uncertainty:*

**a. Allowance for impairment losses on receivables, funds of *qardh*, and financing**

*The Bank examines the quality of assets at statements of financial position date to assess whether impairment should be recorded in the statements of profit or loss and other comprehensive income. In determining whether a provision for impairment losses should be recognised in the profit or loss, the Bank makes estimation of whether there is any indication of impairment in the asset quality. Such estimates are based on the assumption of a number of factors, and the end result may differ, resulting in future changes to allowance for impairment.*

AKUNTANSI YANG PENTING (lanjutan)**

Kondisi spesifik *counterparty* yang mengalami penurunan nilai dalam pembentukan cadangan kerugian atas piutang, pinjaman *qardh*, dan pembiayaan dievaluasi secara individu berdasarkan estimasi terbaik manajemen atas nilai kini arus kas yang diharapkan akan diterima. Dalam mengestimasi arus kas tersebut, manajemen membuat pertimbangan tentang situasi keuangan *counterparty* dan/atau nilai realisasi bersih dari setiap agunan. Setiap aset yang mengalami penurunan nilai dinilai sesuai dengan manfaat yang ada, dan strategi penyelesaian serta estimasi arus kas yang diperkirakan dapat diterima.

Perhitungan cadangan penurunan nilai kolektif meliputi kerugian pembiayaan yang melekat dalam portofolio piutang, pinjaman *qardh*, dan pembiayaan dengan karakteristik ekonomi yang sama ketika terdapat bukti objektif penurunan nilai, tetapi penurunan nilai secara individu belum dapat diidentifikasi. Dalam menilai kebutuhan untuk cadangan kolektif, manajemen mempertimbangkan faktor-faktor seperti kualitas piutang dan segmentasi. Guna membuat estimasi cadangan yang diperlukan, manajemen membuat asumsi untuk menentukan kerugian yang melekat, dan untuk menentukan parameter input yang diperlukan, berdasarkan pengalaman masa lalu dan kondisi ekonomi saat ini. Keakuratan penyisihan tergantung pada seberapa baik estimasi arus kas masa depan untuk cadangan *counterparty* tertentu dan asumsi model dan parameter yang digunakan dalam menentukan cadangan kolektif (Catatan 2d, 9, 10, 11, 12, 46a).

**b. Kewajiban imbalan kerja karyawan**

Nilai kini atas imbalan kerja karyawan tergantung dari banyaknya faktor yang dipertimbangkan oleh aktuaris berdasarkan beberapa asumsi. Perubahan atas asumsi-asumsi tersebut akan mempengaruhi *carrying amount* atas imbalan kerja karyawan.

Asumsi yang digunakan untuk menentukan biaya atau pendapatan untuk imbalan kerja mencakup tingkat diskonto dan kenaikan gaji di masa datang. Adanya perubahan pada asumsi ini akan mempengaruhi jumlah tercatat kewajiban imbalan kerja karyawan.

Bank menentukan tingkat diskonto yang tepat pada setiap periode pelaporan. Ini merupakan tingkat suku bunga yang digunakan untuk menentukan nilai kini atas arus kas masa depan yang diestimasi akan digunakan untuk membayar imbalan kerja.

NOTES TO THE FINANCIAL STATEMENTS**

**As of December 31, 2025 and  
for the Year Then Ended  
(Expressed in millions of Rupiah,  
unless otherwise stated)**

**3. USE OF CRITICAL ACCOUNTING ESTIMATES  
AND JUDGMENTS (continued)**

**a. Allowance for impairment losses on  
receivables, funds of *qardh*, and financing  
(continued)**

The specific condition of impaired *counterparty* in calculating allowances for impairment losses on receivables, funds of *qardh*, and financing is evaluated individually based on management's best estimate of the present value of the expected cash in flows. In estimating these cash flows, management makes judgments about the *counterparty's* financial situation and/or the net realisable value of any underlying collateral. Each impaired assets is assessed on its merits, the workout strategy and estimated recoverable cash flows.

Collectively assessed impairment allowances cover financing losses inherent in portfolios of receivables, funds of *qardh*, and financing with similar economic characteristics when there is objective evidence of impairment, yet the individual impaired items cannot be identified. In assessing the need for collective allowances, management considers factors such as financing quality and product segmentation. In order to estimate the required allowance, assumptions are made to define the way inherent losses are modelled and to determine the required input parameters, based on historical experience and current economic conditions. The accuracy of the allowances depends on how well these estimate future cash flows for specific *counterparty* allowances and the model assumptions and parameters used in determining collective allowances (Note 2d, 9, 10, 11, 12, 46a).

**b. Employee benefits liabilities**

The present value of the employee benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of employee benefit obligations.

The assumptions used in determining the net cost or income for employee benefits include the discount rate and future salary increase. Any changes in these assumptions will have an impact on the carrying amount of employee benefits liabilities.

The Bank determines the appropriate discount rate at the reporting period. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations.

**3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN**  
**AKUNTANSI YANG PENTING (lanjutan)**

**b. Kewajiban imbalan kerja karyawan (lanjutan)**

Dalam menentukan tingkat diskonto yang tepat, Bank mempertimbangkan tingkat suku bunga atas Obligasi Pemerintah yang mempunyai jatuh tempo yang menyerupai jangka waktu imbalan kerja karyawan.

Untuk tingkat kenaikan gaji masa datang, Bank mengumpulkan data historis mengenai perubahan gaji dasar pekerja dan menyesuakannya dengan perencanaan bisnis masa datang.

Asumsi kunci liabilitas pensiun lainnya sebagian ditentukan berdasarkan kondisi pasar saat ini.

**c. Perpajakan**

Bank menentukan provisi perpajakan berdasarkan estimasi atas kemungkinan adanya tambahan beban pajak. Jika hasil akhir dari hal ini berbeda dengan jumlah yang dicatat semula, maka perbedaan tersebut akan berdampak terhadap laba rugi.

Aset pajak tangguhan diakui atas jumlah pajak penghasilan terpulihkan (recoverable) pada periode mendatang sebagai akibat perbedaan temporer yang boleh dikurangkan. Justifikasi manajemen diperlukan untuk menentukan jumlah aset pajak tangguhan yang dapat diakui, sesuai dengan waktu yang tepat dan tingkat laba fiskal di masa mendatang sejalan dengan strategi rencana perpajakan ke depan.

**d. Revaluasi aset tetap**

Revaluasi aset tetap Bank bergantung pada pemilihan asumsi yang digunakan oleh penilai independen dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain: tingkat diskonto, nilai tukar, tingkat inflasi dan tingkat kenaikan pendapatan dan biaya. Bank berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan dalam asumsi yang ditetapkan Bank dapat mempengaruhi secara material nilai aset tetap yang direvaluasi.

**e. Menentukan jangka waktu kontrak dengan opsi perpanjangan dan penghentian kontrak - Bank sebagai lessee**

Bank menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk menghentikan sewa, jika cukup wajar untuk tidak dilakukan.

**3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (continued)**

**b. Employee benefits liabilities (continued)**

*In determining the appropriate discount rate, the Bank considers the interest rates of Government Bonds that have terms to maturity approximating the terms of the related employee benefit liabilities.*

*For the rate of future salary increases, the Bank collects all historical data relating to changes in base salaries and adjusts it for future business plans.*

*Other key assumptions for pension obligations are partly based on current market conditions.*

**c. Taxation**

*The Bank provides for tax provision based on estimates whether the additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the profit loss.*

*Deferred tax assets are recognised for the future recoverable taxable income arising from temporary difference. Management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing on level of future taxable profits together with future strategic planning.*

**d. Fixed asset revaluation**

*The Bank's fixed assets revaluation depends on its selection of certain assumptions used by the independent appraisal in calculating such amounts. Those assumptions include among others: discount rate, exchange rate, inflation rate and revenue and cost increase rate. The Bank believes that its assumptions are reasonable and appropriate and significant differences in the Bank's assumptions may materially affect the valuation of its fixed assets.*

**e. Determine the contract term with extension and contract termination options - the Bank as lessee**

*The Bank determines the lease term as non-cancellable term, together with the period covered by the option to extend the lease if it is determined to be exercised, or any period covered by the option to terminate the lease, if it is reasonably certain not to be exercised.*

**3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN**  
**AKUNTANSI YANG PENTING (lanjutan)**

**e. Menentukan jangka waktu kontrak dengan**  
**opsi perpanjangan dan penghentian kontrak**  
**- Bank sebagai lessee (lanjutan)**

Bank memiliki beberapa kontrak sewa yang mencakup opsi perpanjangan dan penghentian jangka waktu sewa. Bank menerapkan penilaian dalam mengevaluasi apakah dapat dipastikan jika akan menggunakan opsi untuk memperpanjang atau menghentikan sewa. Hal tersebut dilakukan dengan mempertimbangkan seluruh fakta dan keadaan yang relevan yang memberikan insentif ekonomi untuk melakukan perpanjangan atau penghentian sewa. Setelah tanggal dimulainya, Bank menilai kembali masa sewa, jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali dan mempengaruhi apakah lessee cukup pasti untuk mengeksekusi opsi memperpanjang atau menghentikan sewa.

**f. Penyisihan kerugian aset nonproduktif**

Bank menelaah potensi kerugian aset nonproduktif pada setiap tanggal pelaporan untuk menilai apakah terdapat penyisihan penurunan nilai yang harus dibentuk dalam laporan laba rugi dan penghasilan komprehensif lain. Dalam menentukan apakah penyisihan penurunan nilai harus dibentuk, Bank membuat estimasi penilaian apakah terdapat indikasi penurunan nilai dari aset nonproduktif. Estimasi tersebut didasarkan pada pertimbangan dari sejumlah faktor dan hasil akhirnya mungkin berbeda (Catatan 15).

**g. Perlakuan penjualan aset pembiayaan**

Penjualan aset syariah berupa pembiayaan *musyarakah mutanaqishah* ("MMQ") griya dilakukan setelah memenuhi kondisi jual beli yang sesungguhnya (*al-bai' al-haqiqi*), yang ditandai dengan berpindahnya kepemilikan aset pembiayaan MMQ yang diperjualbelikan, tidak ada kewajiban Bank untuk membeli kembali aset pembiayaan dalam bentuk pembiayaan atau dalam bentuk instrumen investasi sekuritisasi efek beragun aset syariah surat partisipasi ("EBAS-SP").

Kontrak jual beli secara syariah harus dibuat dalam bentuk jelas dan final. Prinsip syariah mensyaratkan tidak boleh terdapat dua transaksi dalam satu kontrak. Sehingga Bank memperlakukan penjualan aset pembiayaan sebagai transaksi yang terpisah dari pembelian EBAS-SP kelas B.

**3. USE OF CRITICAL ACCOUNTING ESTIMATES**  
**AND JUDGMENTS (continued)**

**e. Determine the contract term with extension**  
**and contract termination options - the Bank**  
**as lessee (continued)**

The Bank has several lease contracts that include extension and contract termination in the lease terms. The Bank applies its judgment in evaluating whether it is certain to exercise the option to extend or terminate the lease. This is done by considering all relevant facts and circumstances that provide economic incentives to extend or terminate the lease. After the commencement date, the Bank reassesses the lease term, if there is a significant event or change in circumstances which is under its control and affects whether the lessee is certain enough to exercise the option to extend or terminate the lease.

**f. Allowance for impairment losses on non-**  
**earning assets**

The Bank evaluates the potential loss of non-earning assets at each reporting date to assess whether provision for impairment losses should be recognised in the statements of profit or loss and other comprehensive income. In determining whether a provision for impairment losses should be recognised, the Bank makes estimate on whether there is any indication of impairment of non-earning assets. These estimates are based on consideration of a number of factors and the end results may be different (Note 15).

**g. Treatment of sales of financing assets**

The sale of sharia assets in the form of *musyarakah mutanaqishah* ("MMQ") financing is carried out after fulfilling the actual conditions of sale and purchase (*al-bai' al-haqiqi*), which is marked by the transfer of ownership of the MMQ financing assets being traded, there is no obligation of the Bank to buy back the financing assets in the form of financing or in the form of sharia asset-backed securities securitization investment instrument participation letter ("EBAS-SP").

Sharia sale and purchase contracts must be made in a clear and final form. Sharia principles require that there cannot be two transactions in one contract. So the Bank treats the sale of financing assets as a separate transaction from the purchase of class B EBAS-SP.

**Aset tetap (lanjutan)**

Manajemen Bank berpendapat bahwa nilai pertanggungan tersebut cukup untuk menutup kerugian yang mungkin timbul atas aset tetap yang diasuransikan.

Pada tanggal 31 Desember 2025 dan 2024, jumlah tercatat bruto dari setiap aset tetap yang telah disusutkan penuh dan masih digunakan masing-masing sebesar Rp2.766.560 dan Rp2.543.082.

Selain tanah, tidak terdapat perbedaan material antara nilai wajar aset dan nilai tercatatnya.

Nilai tanah Bank berdasarkan model biaya pada tanggal 31 Desember 2025 dan 2024 adalah masing-masing sebesar Rp1.872.173 dan Rp1.872.145.

Manajemen berpendapat bahwa tidak terdapat indikator penurunan nilai aset tetap selain tanah pada tanggal 31 Desember 2025 dan 2024.

**Bangun, Guna dan Serah**

Pada tanggal 28 April 2023, Bank dan PT PP (Persero) Tbk ("PT PP") telah menandatangani perjanjian sehubungan dengan Bangun, Guna dan Serah ("BOT") atas tanah dan bangunan yang berlokasi di Jalan Medan Merdeka Selatan No. 17 Jakarta. Bank memberikan hak eksklusif kepada PT PP untuk memanfaatkan lahan, melakukan pembongkaran gedung eksisting dan melakukan pembangunan gedung baru. Bank berkomitmen untuk menyewa gedung baru selama 30 tahun dan pada akhir masa sewa, PT PP akan menyerahkan penguasaan lahan dan hak pengelolaan gedung kepada Bank.

Berdasarkan perjanjian BOT, Bank berhak menerima kompensasi atas penghancuran gedung lama dari PT PP sebesar Rp241.080 yang akan dibayarkan secara bertahap oleh PT PP selama 5 tahun. Kompensasi ini mengikat PT PP, tidak dapat dibatalkan dan tidak dapat dikembalikan dalam keadaan apapun termasuk apabila Bank mengakhiri kontrak secara sepihak. Berdasarkan syarat-syarat dalam perjanjian, manajemen membuat pertimbangan signifikan bahwa kompensasi dianggap sebagai transaksi terpisah dengan perjanjian sewa gedung baru meskipun kedua unsur tersebut berada dalam satu kontrak yang sama, antara pihak yang sama dan dalam waktu yang bersamaan. Bank mengakui kompensasi yang diterima sebagai pendapatan lain-lain bersamaan dengan pengakuan kerugian atas pembongkaran gedung lama sebesar Rp241.080 untuk tahun yang berakhir 31 Desember 2023.

**14. FIXED ASSETS, RIGHT-OF-USE ASSETS AND  
INTANGIBLE ASSETS - NET (continued)**

**Fixed assets (continued)**

The Bank's management believes the amount is adequate to cover losses which may arise from the insured fixed assets.

As at 31 December 2025 and 2024, the gross amount of fixed assets which have been fully depreciated and are still in use amounted to Rp2,766,560 and Rp2,543,082 respectively.

Other than land, there is no material difference between the fair value of the asset and its carrying value.

The Bank's land value based on the cost model as at 31 December 2025 and 2024 is Rp1,872,173 and Rp1,872,145.

Management believes that there are no indicators of impairment of fixed assets other than land as at 31 December 2025 and 2024.

**Build, Operate and Transfer**

On 28 April 2023, the Bank and PT PP (Persero) Tbk ("PT PP") entered into an agreement in connection with the Build, Operate and Transfer ("BOT") of land and building located at Medan Merdeka Selatan Street No. 17 Jakarta. The Bank granted exclusive rights to PT PP to utilize the land, to demolish the existing building and construct a new building. The Bank commits to rent the building for 30 years and at the end of the lease period, PT PP will hand over the ownership rights of the land and the building to the Bank.

In accordance with the BOT agreement, the Bank is eligible to receive compensation for the demolition of the old building from PT PP amounting to Rp241,080 which will be paid in stages by PT PP over 5 years. This compensation is binding to PT PP, non-cancellable and non-refundable under any circumstances including if the Bank terminates the contract unilaterally. Considering the terms in the agreement, the management makes significant judgment that the compensation is accounted for as a separate transaction to the rental agreement of the new building even though the two elements are in the same contract, between the same parties and at the same time. The Bank recognised the compensation received as other income corresponding with the recognition of loss from demolition of old building amounting to Rp241,080 for the year ended 31 December 2023.

**Revaluasi aset tetap**

Penilaian kembali atas aset tetap dilakukan berdasarkan Standar Penilaian Indonesia. Metode penilaian yang dipakai adalah metode data pasar dan metode pendapatan. Elemen-elemen yang digunakan dalam perbandingan data untuk menentukan nilai wajar aset antara lain:

- a) jenis dan hak yang melekat pada properti;
- b) kondisi pasar;
- c) lokasi;
- d) karakteristik fisik; dan
- e) karakteristik tanah.

Nilai wajar ditentukan dengan menggunakan hierarki dan input-input yang digunakan dalam teknis penilaian untuk aset nonkeuangan:

- Level 1: Input yang berasal dari harga kuotasian (tanpa penyesuaian) dalam pasar aktif untuk aset yang identik;
- Level 2: Input selain harga kuotasian pasar dalam level 1 yang dapat diobservasi baik secara langsung maupun tidak langsung; dan
- Level 3: Input yang tidak dapat diobservasi.

Pengukuran nilai wajar tanah dikategorikan sebagai nilai wajar level 2 berdasarkan input dari teknik penilaian yang digunakan.

Pada tanggal 31 Desember 2025 dan 2024, aset program diinvestasikan ke dalam instrumen pasar uang syariah masing-masing sebesar Rp137.492 dan Rp129.649.

Hasil yang diharapkan dari aset program ditentukan dengan mempertimbangkan imbal hasil yang diharapkan atas aset yang mengacu pada kebijakan investasi. Hasil investasi bunga tetap didasarkan pada hasil pengembalian bruto pada tanggal pelaporan. Hasil yang diharapkan dari investasi ekuitas dan properti mencerminkan tingkat imbal hasil jangka panjang aktual yang terjadi untuk tiap-tiap pasar.

Bank terekspos beberapa risiko atas program imbalan kerja seperti risiko yang terekspos pada program manfaat pasti adalah adanya tingkat hasil investasi di bawah asumsi *discount rate* dan kenaikan gaji aktual yang lebih besar dari asumsi. Hal tersebut menimbulkan peningkatan iuran yang dibayarkan kepada dana pensiun.

Untuk memastikan bahwa posisi investasi telah sesuai dengan kerangka *Asset Liability Matching* ("ALMA"), Bank melakukan pemantauan terhadap investasi atas program pensiun (baik iuran pasti maupun manfaat pasti) dan memastikan tingkat investasi dimaksud mencapai tingkat diskonto yang digunakan. Selain itu, dilakukan implementasi kebijakan penyesuaian gaji sesuai dengan asumsi yang telah digunakan dalam perhitungan aktuarial untuk mengurangi selisih hasil perhitungan atas proyeksi imbalan kerja pasca kerja dengan realisasinya.

As at 31 December 2025 and 2024, plan assets invested to sharia money market each amounting to Rp137,492 and Rp129,649.

The expected return on plan assets is determined by considering the expected return available on the assets in accordance with the current investment policy. Expected yields on fixed interest investments are based on gross redemption yields as at the reporting date. Expected return on equity and property investments reflect long-term real rates of return experienced in the respective markets.

The Bank is exposed to a number of risks through its employee benefit plans such as the exposed risks in the defined benefit pension plan is the lower return on investment compared to assumption on discount rate and the increase in the actual salary is higher than its assumption. These will cause an increase in benefit paid to pension fund.

To ensure that the position of investments is consistent with the Asset Liability Management ("ALMA") framework, the Bank performs monitoring over the investment for the pension program (for both defined benefit and contribution plans) and performs action to ensure the return of investments will meet the applicable discount rate. Apart from that, implementation of salary adjustment policy has been performed in accordance to the assumptions used by actuarial calculation to reduce the gap on the calculation of projected post-employment benefit with its realisation.

**c. Risiko likuiditas**

Risiko likuiditas adalah risiko akibat ketidakmampuan Bank untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank. Seiring dengan perkembangan bisnis Bank, risiko likuiditas merupakan salah satu risiko yang menjadi perhatian utama Bank. Risiko ini dapat terjadi akibat pertumbuhan pembiayaan Bank yang lebih besar dibandingkan dengan pertumbuhan dana pihak ketiga. Perbedaan antara ketersediaan sumber dana dan jatuh tempo piutang dan pembiayaan dapat menyebabkan kesulitan dalam memenuhi kewajiban bank kepada nasabah dan pihak lainnya.

Tindakan yang diambil oleh Bank untuk meminimalisir risiko likuiditas antara lain sebagai berikut:

- 1) Melakukan pemisahan fungsi antara unit *treasury* sebagai *front office*, unit manajemen risiko sebagai *middle office*, dan unit operasional sebagai *back office*.
- 2) Melakukan penempatan dana pada aset likuid berkualitas tinggi sebagai cadangan likuiditas

**c. Liquidity risk**

Liquidity risk is the risk arising from the Bank's inability to meet maturing obligations from cash flow funding sources and/or from high-quality liquid assets that can be pledged, without disrupting the Bank's activities and financial condition. Along with the development of the Bank's business, liquidity risk is one of the risk that become the major concerns of the Bank. It may result from the growth of the Bank's financing which is greater than the growth of third party funds. The difference between the availability of source of funds and the maturity of receivable and financing can lead to difficulty in fulfilling bank obligations to customers and other parties.

The actions taken by the Bank to minimise the liquidity risk include the following:

- 1) Separating the functions between the treasury unit as the front office, the risk management unit as the middle office, and the operations unit as the back office.
- 2) Placing funds in high-quality liquid assets as liquidity reserves.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities which are accessible at the measurement date.
- Level 2: inputs other than quoted prices included in level 1 that are observable for the assets and liabilities, either directly or indirectly.
- Level 3: Fair value measurements are those derived from valuation techniques that include inputs for asset and liability that are not based on observable market data.

The fair value level 1 is valued by using data from Bloomberg.

The fair value level 2 is valued by using data from Indonesia Bond Pricing Agency ("IBPA") and Net Asset Value report which is calculated using a discounted cash flow model based on current yield curve (derived from market data) appropriated with the remaining term of maturity.

- Amendment of SFAS 109: "Classification and Measurement of Financial Instruments" regarding the derecognition of financial liabilities, as well as clarifying the assessment of cash flow characteristics for financial assets with ESG-linked features, financial assets with non-recourse features, and contractually bound instruments such as tranches.
- Amendment of SFAS 107: "Classification and Measurement of Financial Instruments" regarding requirements for investments in equity instruments measured at fair value through other comprehensive income and adding provisions related to financial instruments with contractual terms that change the timing or amount of contractual cash flows.

Effective beginning on or after 1 January 2027.

- Amendment of SFAS 118: "Presentation and Disclosure in Financial Statements" regarding the required disclosure of specified total and subtotal presentation within the statement of profit or loss, including subtotals. Furthermore, entities are required to classify all income and expenses within the statement of profit or loss into one of five categories: operating, investing, financing, income taxes and discontinued operations, whereof the first three are new. It also requires disclosure of newly defined management-defined performance measures, subtotals of income and expenses, and includes new requirements for aggregation and disaggregation of financial information.
- Amendment of SFAS 413: "Impairment" regarding the impairment of financial instruments, namely shariabased financial assets and kafalah for credit risk guarantees. SFAS 413 is applied to sharia financial assets in the form of collection rights whose cash amount and scheduled payment have been determined in the contract. The calculation of impairment in SFAS 413 uses the concept of expected loss whose calculation reflects the unbiased and probabilityweighted amount and reasonable and supportable information. This calculation does not reflect the time value of money.

**Surat Kuasa Khusus (SKK)**

Bank telah menyelenggarakan Rapat Umum Pemegang Saham Luar Biasa Perseroan tanggal 22 Desember 2025 ("RUPSLB") dengan salah satu mata acara RUPSLB berupa persetujuan perubahan Anggaran Dasar ("AD"), di mana salah satu poin penting perubahan AD Bank adalah penambahan hak istimewa pemegang saham Seri A Dwiwarna berdasarkan ketentuan UU BUMN. Perubahan Anggaran Dasar Perseroan tersebut telah mendapatkan persetujuan Kementerian Hukum Republik Indonesia Nomor AHU 0003351.AH.01.02.TAHUN 2026 Tentang Persetujuan Perubahan Anggaran Dasar Perseroan Terbatas PT Perusahaan Perseroan (Persero) PT Bank Syariah Indonesia Tbk tanggal 23 Januari 2026 dan Penerimaan Pemberitahuan Perubahan Anggaran Dasar dari Kementerian Hukum Republik Indonesia Nomor AHU AH.01.03-0019406 tanggal 23 Januari 2026.

Dengan telah efektifnya perubahan Anggaran Dasar Perseroan maka secara administrasi Perseroan telah efektif berstatus sebagai Persero sehingga penulisan nama Perseroan pada pasal 1 Anggaran Dasar disesuaikan menjadi "PT Bank Syariah Indonesia (Persero) Tbk" sebagaimana diatur dalam peraturan perundang-undangan yang berlaku.

**56. EVENT AFTER THE REPORTING DATE**

**Amendment to the Articles of Association and**  
**Issuance of a Special Power of Attorney**

The Bank held an Extraordinary General Meeting of Shareholders ("EGMS") on 22 December 2025, with one of the agenda items being the approval of amendments to the Articles of Association ("AoA"), whereby one of the key points of the AoA amendment for the Bank is the granting of additional special rights to Series A Dwiwarna shareholders based on the provision of SOE Law. The amendments to the Company's AoA have been approved by the Ministry of Law of the Republic of Indonesia under Decree No. AHU 0003351.AH.01.02.TAHUN 2026 Regarding the Approval of Amendments to the Articles of Association of the Limited Liability Company PT Perusahaan Perseroan (Persero) PT Bank Syariah Indonesia Tbk dated 23 January 2026 and acknowledgment of notification No. AHU-AH.01.03-0019406 dated 23 January 2026.

With the effective change of the Company's Articles of Association, the Company is administratively effective as a State-Owned Enterprise, so the name of the Company in Article 1 of the Articles of Association is adjusted to "PT Bank Syariah Indonesia (Persero) Tbk" as regulated by the applicable laws and regulations.

**56. PERISTIWA SETELAH TANGGAL PERIODE  
PELAPORAN (lanjutan)**

**Perubahan Anggaran Dasar dan penerbitan  
Surat Kuasa Khusus (SKK) (lanjutan)**

Setelah dilakukannya perubahan AD Perseroan tersebut, Badan Pengaturan Badan Usaha Milik Negara/BP BUMN (dahulu bernama Kementerian BUMN) yang mewakili Pemerintah sebagai pemegang saham Seri A Dwiwarna pada Perseroan menerbitkan Surat Kuasa Khusus ("SKK") Nomor SKK-7/BPU/01/2026 tanggal 27 Januari 2026 yang melimpahkan sebagian hak dan kewenangan dari pemegang saham Dwi warna kepada PT Danantara Asset Management ("DAM") selaku Holding Operasional BUMN berdasarkan UU BUMN, dan mencabut SKK sebelumnya yang diberikan kepada PT Bank Mandiri (Persero) Tbk salah satu pemegang saham Bank. ("Bank Mandiri")

Dampak dari hal diatas adalah Bank Mandiri telah kehilangan pengendalian atas Bank sesuai dengan kriteria dari Standar Akuntansi Keuangan yang berlaku di Indonesia sejak 27 Januari 2026, karena pengendalian tersebut telah berpindah ke DAM.

**56. EVENT AFTER THE REPORTING DATE  
(continued)**

***Amendment to the Articles of Association and  
Issuance of a Special Power of Attorney  
(continued)***

*Following the amendment of the Company's AOA, the State-Owned Enterprises Regulatory Agency / BP BUMN (previously known as Ministry of SOE) which represents the Government, as the holder of Series A Dwiwarna shares in the Company issued a Special Power of Attorney ("SPA") No. SKK-7/BPU/01/2026 dated 27 January 2026, which transferred some of the rights and authorities of the Dwiwarna shareholders to PT Danantara Asset Management ("DAM") as the Operational Holding of SOE pursuant to the SOE Law, and revoked the previous SKK granted to PT Bank Mandiri (Persero) Tbk, one of the Bank's shareholders. ("Bank Mandiri")*

*The impact of the above is that Bank Mandiri lost its control over the Bank in accordance with the criteria of prevailing Indonesian Accounting Standard since 27 January 2026, as the control has been transferred to DAM.*
