

MONTHLY ACTIVITY REPORT – LA CAÑADA FLINTRIDGE

FEBRUARY 2026

ALL RESPONSES

PATIENTS SEEN

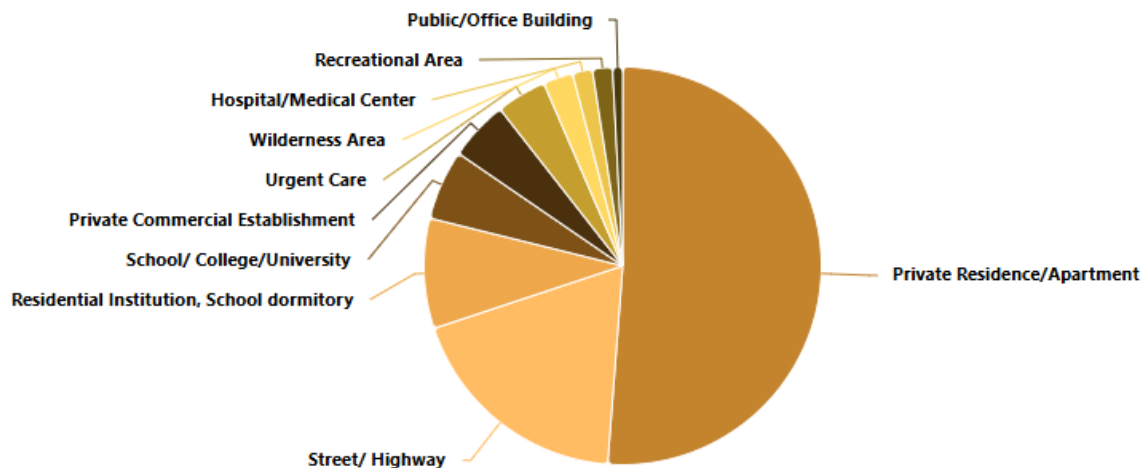

*Total Patients Seen may be higher than Total Medical Responses due to multiple patients at any given incident.

NOTEWORTHY INCIDENTS

2/15/26	Public Service	4601 Alta Canyonada Road	Gas leak detected by Gas Company representative. Fire and Gas Co personnel each took readings, with nothing detected before leaving scene. Gas was shut off, but safe for residents to remain. Advised for gas to remain off until residents called for repairs to the leak. FD assisted in ventilating the home as well.
2/16/26	Public Service	733 Craig Avenue	Responded to call of wires down; determined to be communication lines, not power. Lines were then cut so as not to interfere with vehicles on the road; notifications made for repairs.
2/17/26	Structure Fire	334 Saint Katherine Drive	Circuit breaker for air conditioning unit was tripped. Produced smoke throughout the unit, but no fire. Unit was ventilated, and utilities were dispatched to investigate.
2/23/26	Vehicle Fire	Westbound 2210 at 2 Freeway	

MEDICAL INCIDENTS BY LOCATION TYPE

TRAFFIC COLLISIONS TOTAL: 13

NOTEWORTHY TRAFFIC COLLISIONS		
2/16/26	484 Berkshire Avenue	Mercedes 2-door vehicle found lying on its driver side. Search revealed no one inside vehicle and no patient found in the vicinity.
2/24/26	Berkshire Avenue / Chevy Chase Drive	Adult male riding bike, clipped by vehicle’s side-view mirror. Minor injuries, declined transport.
2/25/26	Foothill Blvd. / Castle Road	14 year old male riding bike, clipped by vehicle turning right. Patient landed on his back, and was wearing a helmet, which was not compromised. Mother arrived on scene, and patient was transported.

Note: Where two streets are listed, the first street is the street on which the collision occurred; the second street is the closest cross-street. Th two streets listed do not necessarily mean the collision occurred in the intersection.

SAFETY TIP OF THE MONTH:

Carbon monoxide (CO) is known as the “silent killer” because it is an odorless, tasteless gas that cannot be seen. CO poisoning can result from faulty furnaces or other heating appliances, clothes dryers, or cars left running in garages. Some symptoms of CO poisoning include headaches, nausea, and drowsiness. Exposure to undetected high levels of CO can be fatal. To avoid CO poisoning:

- Ensure all fuel-burning vented equipment is vented to the outside.
- Keep the venting for exhaust clear and unblocked.
- Do not leave your car running in the garage, even if the garage doors are open.
