

Troubleshooting step

Here are some hints to help you get the best out of your Sleptight™ blind...

- Wash the suction cups with warm soapy water, rinse and dry with lint-free cloth.
- Best results are achieved when both the glass and suction cups are at room temperature.
- To re-shape deformed suction cups, simply place them in a bowl of hot water for 2-3 minutes.
- When the blind is not in use, store it in the handy travel bag. When packed away it measures 290 x 230 x 60mm making it compact enough to easily fit in a suitcase or overnight bag.
