U 4270 B

FM IF limiter amplifier and detector

Description

The U 4270 B is an integrated bipolar FM-IF amplifier circuit with field strength indicator, stop signal generator,

multipath detector and controllable mute function. It is designed for car radios and home receiver applications.

Features

- 7 stage limiter amplifier
- Multipath signal detector
- Stop signal generator with controllable threshold
- Signal strength output
- Controllable mute function
- High signal/noise ratio and low signal distortion

Technical drawing of a mass flow meter housing (Masse-Fluer-Gehaeuse) showing three views: front, side, and top.

Front View (Top): Shows the housing with dimensions: overall width $6,65 \pm 0,08$ (1.358 ± 0.008), overall length $6,5 \pm 0,1$, and a small feature width $0,15$. The housing has a series of vertical slots. A detail shows a slot width of $0,12$ and a depth of $0,25$. The bottom edge has a width of $9 \times 0,65 = 5,85$ and a height of $0,05 \pm 0,1$. A small feature at the bottom right has a width of $0,65$ and a height of $0,15$. The housing is labeled with a circled 20 and a circled 11.

Side View (Right): Shows the housing with dimensions: overall width $5,5 \pm 0,2$, overall length $4,4 \pm 0,1$, and a small feature width $0,15$. The housing has a series of vertical slots. A detail shows a slot width of $0,12$ and a depth of $0,25$. The bottom edge has a width of $9 \times 0,65 = 5,85$ and a height of $0,05 \pm 0,1$. A small feature at the bottom right has a width of $0,65$ and a height of $0,15$. The housing is labeled with a circled 20 and a circled 11.

Top View (Bottom): Shows the housing with dimensions: overall width $6,65 \pm 0,08$ (1.358 ± 0.008), overall length $6,5 \pm 0,1$, and a small feature width $0,15$. The housing has a series of vertical slots. A detail shows a slot width of $0,12$ and a depth of $0,25$. The bottom edge has a width of $9 \times 0,65 = 5,85$ and a height of $0,05 \pm 0,1$. A small feature at the bottom right has a width of $0,65$ and a height of $0,15$. The housing is labeled with a circled 20 and a circled 11.

OZONE DEPLETING SUBSTANCES POLICY STATEMENT

It is the policy of **TEMIC TELEFUNKEN microelectronic GmbH** to

1. meet all present and future national and international statutory requirements and
2. regularly and continuously improve the performance of our products, processes, distribution and operating systems.
With respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

Of particular concern is the control or elimination of releases into the atmosphere of substances who are known as ozone depleting substances (ODS's).

The Montreal Protocol (1987) and its London Amendments (1990) will severely restrict the consumption of ODS's and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

TEMIC TELEFUNKEN microelectronic GmbH semiconductor division has been able to use its policy of continuous improvements to eliminate the use of any ODS's listed in the following documents that all refer to the same substances:

- (1) Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
- (2) Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA and
- (3) Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

TEMIC can certify, that our semiconductors are not manufactured with and do not contain ozone depleting substances.

We reserve the right to make changes without further notice to improve technical design.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by customer. Should Buyer use TEMIC products for any unintended or unauthorized application, Buyer shall indemnify TEMIC against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
