DADE COUNTY MEDICAL ASSOCIATION

The Dade County Medical Association considers itself doubly complimented by the return of the Southern Medical Association to Miami, Florida, in October, only two years after the 1946 meeting. Previous lessons and better arrangements for scientific meetings and exhibitions within one convenient and attractive location should contribute to a more enjoyable convention.

The youth and growth of Greater Miami is paralleled by its medical organization. The Medical Society was organized in 1904 and was incorporated as the Dade County Medical Association in October 1927, twenty-one years ago. This Association, as of July 1948, has 495 full members and 50 probationary members. Like its citizens and guests, Greater Miami's doctors present a cross section of the United States.

The officers of the Association are: Dr. Robert T. Spicer, President; Dr. John D. Milton, President-Elect; Dr. Harold Rand, Vice-President; Dr. Benjamin F. Oren, Secretary; Dr. Ralph S. Sappenfield, Treasurer; and Dr. Carlos P. Lamar, Editor of the Bulletin. The Dade County Medical Association has a full time Executive Secretary, Mr. George L. Cantzlaar, with offices at 501 Biscayne Building, Miami.

May YOU and YOUR FAMILY enjoy your 1948 meeting in Miami, Florida.

TECHNICAL EXHIBITS

At the Miami meeting may be expected only the highest type group of technical, sometimes called commercial exhibits attended by a group of specialized and courteous representatives who are concerned only with being of service to those physicians attending the meeting.

A policy adopted eight years ago for making the exhibits more worthwhile has been generally accepted by the various commercial houses, and personnel of the various booths will be found willing at every turn to keep the exhibits on a dignified plane.

The policy is concerned with (a) *selling,* (b) *samples* and (c) *souvenirs* and for clarification the following short explanation is given: (a) the atmosphere of the exhibit is to be that of show and demonstration and not of selling. Should a physician wish to purchase an item on display it is permissible for the exhibitor to take his order for the item either for delivery from the booth or to be sent later—the technical exhibits are for the benefit of the attending physicians. (b) Samples and literature may be displayed within the exhibit and may be given out at the exhibit when the desire for them is indicated. It is permissible for those calling at exhibits to have their names taken for samples and literature to be sent from the home office of the exhibitor. (c) Souvenirs of any description cannot be given away at any exhibit or at any point in the hotels or meeting places.

The object is to make the Technical Exhibits more definitely a scientific and educational part of the Southern Medical Association meetings and therefore worth definitely more to attending physicians.

We urge you to visit the Technical Exhibits.
