# About Unirec

We have been in the business of readymade garments and uniforms for over two decades.

UNIREC has been started with a vision to make the world fashionable with a minimum effect on the environment. All the garments manufactured at UNIREC are made from recycled plastic bottles which not only ensure that plastic stays out of the environment and in the economy.

Furthermore, every garment made from recycled plastic bottles emits lower carbon emissions than others. Our mission is to reduce carbon emissions one person at a time, one garment at a time.

We sincerely hope that you enjoy the UNIREC experience.

Made from recycled PET bottles
