

# SnapShot + Editorial Manager®

Time-consuming manual data sharing checks and inconsistent journal standards often lead to expensive workflow delays and low levels of policy compliance. Scholarly journals leveraging an Open Data approach can promote transparency and strengthen research integrity.

The seamless integration between Editorial Manager® (EM) and DataSeer SnapShot offers publishers an automated data-assessment solution designed to cost-effectively screen Author data sharing practices at scale.

## Comprehensive Open Data Screening

Evaluate sharing of new datasets

Improve data citation

Capture datasets in repositories and files

Navigate ethical restrictions

## Customized Checks

- ✓ Conducts advanced analysis of data statements and repository links
- ✓ Aligns flexible checks with each journal's unique needs and policies
- ✓ Continuously refines evaluation criteria based on live editorial feedback

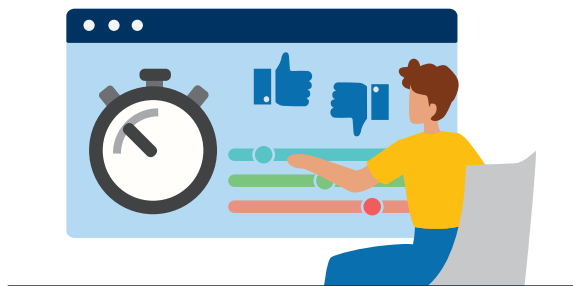

## Seamless Automation

- ✓ Automatically scans full text of manuscripts at submission and revision
- ✓ Streamlines screening so compliant articles progress to peer review
- ✓ Saves Editors time with identifying and navigating problematic articles

## Policy-Driven Reports

- ✓ Returns results to EM with direct access to concise, itemized reports
- ✓ Provides guidance and email-ready communication for required Author actions
- ✓ Supports consistent application of journal and funder policies
