

EDUCATION

- **University of Washington** Seattle, WA, USA
Ph.D Candidate in Computer Science & Engineering *Sep. 2019 - Present (Mar. 2024)*
Thesis: *Distributing Trust in Critical Societal Scale Computing Infrastructure*

Advised by: Prof. Kurtis Heimerl & Prof. Richard Anderson.
Affiliated to Systems & ICTD Lab
*Awarded the **Bob Bandes Memorial Honorable Mention Student Teaching Award** (2022-2023)*
*University Nominee **Microsoft Research PhD Fellowship** 2021*
*Finalist **Qualcomm Innovation Fellowship** 2021*
*Supported by the **Gaetano Borriello Endowed Fellowship for Change** (2019-2020)*
Teaching Assistant CSE 550 Computer Systems - Fall 2020 with Prof. Kurtis Heimerl
Teaching Assistant CSE 564 Security and Privacy - Fall 2022 with Prof. Tadayoshi Kohno
- **National Institute of Technology, Warangal** Warangal, India
Bachelor of Technology in Computer Science & Engineering *Jun. 2012 – May. 2016*

Undergraduate Project Advised by: Prof. K. Ramesh. *Dept. of Computer Science and Engineering*
IEEE - EPICS Project Advised by: Prof. L. Anjaneyulu. *Dept. of Electronics & Communication Engineering*
- **Indian School of Business, Hyderabad** Hyderabad, India
Certificate in Technology, Entrepreneurship and Product Design; *May. 2014 – May. 2016*

PUBLICATIONS

16. dAuth:A Resilient Authentication Architecture for Federated Private Cellular Networks
*Matthew Johnson, **Sudheesh Singanamalla**, Nick Durand, Esther Jang, Spencer Sevilla, and Kurtis Heimerl. 2024. In the proceedings of the ACM SIGCOMM 2024 Conference. Sydney, Australia.*
15. Retrofit: Enabling Interoperable E2EE Communication Through 6G Cellular Architectures
***Sudheesh Singanamalla**, Richard Anderson, Kurtis Heimerl. 2024. Poster at NDSS 2024. San Diego, CA*
14. On the (In)Security of Government Web and Mail Infrastructure
*Evan Lam, Richard Anderson, Kurtis Heimerl, Yurie Ito, Jonathan Joseph de Koning, Adam M. Lange, Jarrod O'Malley, Adam Shostack, Arastoo Taslim, **Sudheesh Singanamalla**. 2024. Poster at NDSS 2024. San Diego, CA*
13. Notably Inaccessible - Data Driven Understanding of Data Science Notebook (In)accessibility
Venkatesh Pothuri, **Sudheesh Singanamalla***, Nussara Tieanklin, and Jennifer Mankoff. 2023. In the proceedings of the 25th International ACM SIGACCESS Conference on Computers and Accessibility (ASSETS'23). New York City, NY, USA.*
12. Nimble: Rollback Protection for Confidential Cloud Services
*Sebastian Angel, Aditya Basu, Weidong Cui, Trent Jaeger, Stella Lau, Srinath Setty, and **Sudheesh Singanamalla**. (Alphabetized) 2023. In the proceedings of the Usenix Symposium on Operating System Design and Implementation (OSDI'23). Boston, MA, USA.*
11. Respect the ORIGIN! A Best-case Evaluation of Connection Coalescing
***Sudheesh Singanamalla**, Muhammad Talha Paracha, Suleman Ahmad, Jonathan Hoyland, Luke Valenta, Yevgen Safronov, Peter Wu, Andrew Galloni, Vasileios Giotsas, Kurtis Heimerl, Nick Sullivan, Christopher Wood, and Marwan Fayed. 2022. In the proceedings of the ACM Internet Measurement Conference (IMC'22), Nice, France.*
10. TeleChain: Bridging Telecom Policy and Blockchain Practice
***Sudheesh Singanamalla**, Apurv Mehra, Nishanth Chandran, Himanshi Lohchab, Seshanuradha Chava, Asit Kadayam, Sunil Bajpai, Kurtis Heimerl, Richard Anderson, Satya Lokam. 2022. In the proceedings of the 2022 ACM SIGCAS/SIGCHI Conference on Computing and Sustainable Societies (COMPASS'22). 20 pages.*

9. When Borders Blur - Overcoming Political Limits with Computing in Truly Global Societies
*Emmanuel Azuh Mensah, **Sudheesh Singanamalla**, Richard Anderson, and Kurtis Heimerl. 2021. In the proceedings of the 2021 workshop on computing within limits (LIMITS'21).*
8. 🐼 Oblivious DNS over HTTPS (ODOH): A Practical Privacy Enhancement to DNS
Sudheesh Singanamalla, Suphanat Chunchapanya, Jonathan Hoyland, Marek Vavruša, Tanya Verma, Peter Wu, Marwan Fayed, Kurtis Heimerl, Nick Sullivan, and Christopher Wood. *In the proceedings of Privacy Enhancing Technologies Symposium (PoPETS'21). 18 pages.*

Awards: Andreas Pfitzmann Best Student Paper Award 2021
Press: Covered by 50+ venues, Notably: Cloudflare Blog, Schneier on Security, Security Boulevard, TechCrunch, Verge, ZDNet, Cyberscoop, NDTV Gadgets, 9to5mac, SlashDot, AppleInsider etc..,
7. Whale Watching in Inland Indonesia: Analyzing a Small, Remote, Internet-Based Community Cellular Network
*Matthew Johnson, Jenny Liang, Michelle X. Lin, **Sudheesh Singanamalla**, and Kurtis Heimerl. 2021. In the proceedings of the Web Conference 2021 (WWW'21), Ljubljana, Slovenia. 12 pages.*
6. Accept the Risk and Continue: Measuring the Long Tail of Government https Adoption
Sudheesh Singanamalla, Esther Han Beol Jang, Richard Anderson, Tadayoshi Kohno, and Kurtis Heimerl. 2020. *In the proceedings of the ACM Internet Measurement Conference (IMC'20), Pittsburgh, PA, USA. 25 pages.*
5. Blockene: A High Throughput Blockchain Over Mobile Devices
*Sambhav Satija, Apurv Mehra, **Sudheesh Singanamalla**, Karan Grover, Muthian Sivathanu, Nishanth Chandran, Divya Gupta, and Satya Lokam. 2020. In the proceedings of the Usenix Symposium on Operating System Design and Implementation. (OSDI'20). Banff, Alberta, Canada. 25 pages.*
4. PACT: Privacy Sensitive Protocols and Mechanisms for Mobile Contact Tracing
*Justin Chan, Landon Cox, Dean Foster, Shyamnath Gollakota, Eric Horvitz, Joseph Jaeger, Sham Kakade, Tadayoshi Kohno, John Langford, Jonathan Larson, Puneet Sharma, **Sudheesh Singanamalla**, Jacob Sunshine, Stefano Tessaro. In the IEEE Bulletin of the Technical Committee on Data Engineering. June 2020. Vol. 43 No. 2*
3. PocketATM: Understanding and Improving ATM Accessibility in India.
Sudheesh Singanamalla, Venkatesh Potluri, Colin Scott and Indrani Medhi-Thies. 2019. *In the proceedings of the 10th International Conference on Information and Communication Technologies and Development (ICTD '19). Ahmedabad, India. 10 pages.*
2. Avatar: Enabling Immersive Collaboration via Live Mobile Video.
Sudheesh Singanamalla, William Thies, and Colin Scott. 2018. *In 3rd International Workshop on Multimedia Alternate Realities (AltMM18) at ACM Multimedia'18 (MM'18) October 22, 2018, Seoul, Republic of Korea. 6 pages.*
1. Vishrambh: Trusted Philanthropy with End-to-End Transparency.
*Apurv Mehra, Ankush Jain, **Sudheesh Singanamalla**, Satya Lokam, Muthian Sivathanu, Jacki O'Neill. 2018. In the 1st International Workshop on HCI for Blockchain at ACM CHI 2018, Montreal, QC, Canada. 4 pages.*

RESEARCH EXPERIENCE

- **Cybergreen** Seattle, WA, USA
Research Scientist & Lead Software Engineer *Apr 2021 - May 2024*
 - **Internet Health Metrics:** By building and running high performance Internet scanners for scanning and validating TLS, mail, and DNS infrastructure, the research efforts aim to understand Internet public health. In collaboration with various governments in the ASEAN region, the research focuses on developing a set of models and metrics to measure public health using epidemiology as a framework for security assessments.
- **Cloudflare Research** London, ENG, UK
Research Intern (Reported to: Dr. Marwan Fayed) *Apr 2022 - Oct 2022*
 - **What's in an IP?:** The foundation of the Internet network is the Internet Protocol (IP) addresses which are a set of numbers used to identify devices on the Internet and communicate with them. In this effort, we take a look back through the nature of IP addresses today, systematically disprove common assumptions about Identity, Geolocation, and Privacy. to the Internet, and propose a road map for re-thinking the role and importance of IP addresses today supported by large Internet scale scans. *(Advised by Dr. Marwan Fayed)*

• Microsoft Research

Redmond, WA, USA

Research Intern (Advised by: Dr. Srinath Setty, Dr. Sebastian Angel & Dr. Weidong Cui)

Jun 2021 - Sep 2021

- **Nimble - Preventing Rollback Attacks in Cloud (Storage) Services:** The movement to the cloud forces organizations to trust the cloud services offered by various public clouds. A malicious/compromised cloud provider can perform equivocation attacks by providing stale data from a database/storage service. While the usage of TEEs ensure confidentiality and authenticity, it still is possible for providing stale data to the application. Nimble provides a mechanism to guarantee freshness, confidentiality and authenticity of information provided by cloud services thereby decoupling trust between the organization and the cloud provider.

• Cloudflare Research

Kirkland, WA, USA

Cryptography/Technology Research Intern (Reported to: Nick Sullivan)

Jun 2020 - Apr 2021

- **Oblivious DNS over HTTPS (ODOH):** As the usage of encrypted DNS protocol variants like DNS over HTTPS or DNS over TLS gain widespread adoption, it creates privacy concerns where the operators of the DNS resolvers can record and profile the traffic pattern of the client. With the implementation, and evaluation of ODOH at scale the project shows that the protocol is a practical way to enhance privacy while being performant and not having adverse effects on page load times. *(Advised by Dr. Christopher Wood and Dr. Marwan Fayed)*
- **Measuring Censorship Passively and Ethically:** Censorship of Internet traffic affects billions of users around the world. Measuring censorship lends critical insight into how censors operate, but it can be very difficult to perform. Traditional approaches involve active probing from a set of vantage points. Tripwire introduces an ethical and passive measurement of censorship on path outside of censorship regimes. *(Advised by Dr. Luke Valenta)*
- **Improving Web Performance through Connection Coalescing:** As the Internet becomes more centralized with a majority of the network traffic being sent to a few autonomous systems, it enables possibilities for speeding up page load times for users browsing the Internet. The project evaluates the centralization of the Internet, and the impact of network connection coalescing on page load time, security & user privacy. *(Advised by Dr. Marwan Fayed and Dr. Christopher Wood)*

• Microsoft Research

Bangalore, KN, India

Research Fellow (Advised by: Dr. Bill Thies & Dr. Muthian Sivathanu)

Jan 2017 - Jul 2019

- **☞ Vishrambh - Societal Scale Blockchain Architecture for Philanthropies:** The project aims to leverage the properties of blockchain technology combined with IndiaStack to build a corruption free and end to end completely auditable philanthropic platform. As a part of the project I have been responsible for building and testing the novel architectures & consensus protocols for the underlying system in addition to the implementation of the proof of concept for the philanthropic use case.
Awards: Winner of the Microsoft Blockchain challenge and four IndiaStack challenge awards from Microsoft India Leadership Team.
- **TeleChain - Blockchain for Commercial Communication & Telecom Regulations:** The low tariffs and direct reach to millions of mobile telecom subscribers across India has made SMS and direct calling one of the most effective ways to sell services. However, this has brought with it a serious invasion of privacy and unsolicited commercial communication (UCC). In collaboration with Telecom Regulatory Authority of India (TRAI), the telechain project focuses on using blockchain to curb the growing menace of UCC.
Impact: The project is intended to go live across the country starting December 2018 to simplify the woes of UCC and has resulted in a revised telecom regulation for commercial communication in India.
- **Avatar Project - Exploring Productive Employments via Live Video Collaborations:** With increasing 4G and smartphone penetration in countries like India, the research aims to explore feasibility of productive employment opportunities for low income workers as a part of mobile crowd sourcing with real time mobile video. Additionally, the research focuses on ethical challenges that arise due to asymmetric power relationship among the parties involved during a video stream.
- **PocketATM - Understanding & Improving ATM Accessibility:** Financial services and ATM transactions are largely inaccessible to people with vision impairments. Motivated by accessibility barriers posed by ATMs for visually impaired users, PocketATM is a system which is proposed as a feasible solution to improve ATM accessibility and usability among both visually impaired users and sighted users.
- **Distributed Mobile Open Playgrounds:** The game mechanics of most digital games are fixed by the developers and designers of that game. This research project aims to build open playgrounds that can be used by players to design and create their own experiences. In this work, we build a P2P digital card game system along with a collaborative marketplace and tools to edit the gameplay to make it more engaging and interesting.

WORK EXPERIENCE

- **Microsoft India R&D Private Limited** Hyderabad, TS, India
Software Engineer (Reported to: Veerendra Kumar Balla & Sastry Sriramula) *Jun 2016 - Dec 2016*
 - **1 Engineering Systems - Application Insights & Telemetry:** As a part of the IES group working on a shared common telemetry platform inside Microsoft, I was responsible for building the layers of authentication for securing the data using Azure Active Directory and for creating developer tools for easily ingesting terabytes of data to the cold storage clusters. I've also been responsible for building microservices that allow easy ingestion of large amounts of data from Microsofts' engineering infrastructure.
*Awards: Received the **Star performer** award for building and shipping data collection procedures to make efficient fault detections in supply chain systems involving Kinect & Surface.*
- **Google Summer of Code** Worldwide
Student Developer with FOSSASIA *Summer 2016 and 2015*
 - **Loklak apps/microservices to the open tweet platform and IoT integrations.:** During the summer of 2016, As a continuing member of the Loklak project, I've been responsible for integrating more data stream sources added to Twitter into the servers. I implemented the interfaces for additional data streams from IOT devices to stream into a local cluster and connect a home automation system controlled by Twitter. This project separated into Susi.AI and Loklak for keeping rule based AI and data collections mechanisms separate.
 - **Timeline and search navigation for loklak.net:** As one of the founding members of the Loklak project under the FOSSASIA umbrella, I was responsible for building search and navigation systems using the data collected via the P2P crawlers along with enhancing crawlers and their open source adoption.
- **Microsoft India R&D Private Limited** Hyderabad, TS, India
Software Engineering Intern (Reported to: Jaydeep Baliram Sawant) *May 2015-Aug 2015*
 - **Corporate Functions - Patent search and mining:** As a part of the corporate functions group, I was responsible for development of web API services and data collection services that help the legal teams within Microsoft to quickly search for patents and find related art work.
 - **Tutoring systems for Visual Studio:** As an intern, I implemented a proof of concept for the patent US20170039041A1 that integrates and implements a remote tutor experience from Video and Audio streams directly into the Visual Studio IDE. The tutors code and IDE states are played back to the students learning from platforms like Code9, Lynda or Microsoft Learning.
- **Redhat India** Bangalore, KN, India
Software Engineering Intern (Reported to: Soumya Deb) *Dec 2014 - May 2015*
 - **Bugzilla bug tracker and management:** During my internship at Redhat, I was responsible for building the RPC layers within Bugzilla, the bug tracker within Redhat and build tools to generate dashboards for the management teams to understand their developer performance, categorize and prioritize the features that are pending in the engineering backlog.

PATENTS

1. Lightweight Blockchain Based On Split Trust.

Muthian Sivathanu, Nishanth Chandran, Divya Gupta, Apurv Mehra, Satyanarayana V. Lokam, Sambhav Satija, Sudheesh Singanamalla. 2021. USPTO. Pub. No. US20210014042A1

INVITED TALKS & DEMOS

- **UW Industry Affiliates - 2023:** *Respect the ORIGIN! A Best-case Evaluation of Connection Coalescing in the Wild*
- **IETF 118 - IRTF MAPRG - 2023:** *Characterizing Open DNS resolver misbehavior for DNSSEC queries*
- **7th IEEE European Symposium on Security and Privacy - Genoa, Italy, 2022:** *Oblivious DNS over HTTPS*
- **Next Generation Networking and Multi-service networks workshop - 2022:** *Respect the ORIGIN! A Best-case Evaluation of Connection Coalescing in the Wild*
- **Microsoft Research Security & Privacy Workshop 2021:** *Oblivious DNS over HTTPS*
- **Hyperledger Global Forum 2021:** *Access for the Next Billion - Decentralizing Authentication and Handover in 5G*
- **DNS Operations, Analysis and Research Center - 2021:** *Oblivious DNS over HTTPS*
- **DNS Privacy Workshop at NDSS - 2021:** *(Updated) Oblivious DNS over HTTPS - Measurements & Feasibility*
- **Cloudflare TV - 2020:** *Deep Dive into Oblivious DNS over HTTPS*

- **Encrypted DNS Deployment Initiative (EDDI)-2020:** *Oblivious DNS over HTTPS - Measurements & Feasibility*
- **IETF 109 - IRTF MAPRG - 2020:** *Oblivious DNS over HTTPS - Measurements & Feasibility*
- **IETF Decentralized Internet Infrastructure RG - 2020:** *Decentralizing LTE Authentication & Roaming.*
- **Hyperledger Global Forum - 2018:** Invited by the Linux Foundation's for the Hyperledger Global Forum to speak about *Wrangling Hyperledger - Usability lessons learnt the hard way and steps ahead.*
- **Microsoft Global Demo Day - 2018:** Invited by Microsoft Garage and Global Delivery units at Microsoft to present *Vishrambh - A scalable blockchain solution for end to end tracing and audit.*
- **Microsoft Research TechFest - 2018:** Presented the demo of *Vishrambh* at TechFest 2018, the annual event from Microsoft Research.
- **Google Mentor Summit - 2017:** Presented a short talk on *The future of Loklak & Susi.ai and development plans.*
- **FOSSASIA - 2017:** Presented a talk on *Improving fault detection and real time analytics with telemetry.*
- **FOSSASIA - 2017:** Presented a talk on *Leveraging Loklak for analytics with twitter data and introduction to weak and rule driven AI with susi.ai*
- **FOSSASIA - 2016:** Presented a talk on *Loklak - Endless possibilities with social media.*
- **FOSSASIA - 2016:** Presented a talk on *Game Automators - Making learning fun with mobile games.*
- **Mozilla India - 2015:** Presented a workshop on *importance of open source and how one could get started with OSS.*
- **Google Developer Group, Kuwait - 2015:** What is the right visualization? Exploring the world of data driven documents.
- **Kuwait Institute of Scientific Research - 2014:** Using open source technologies to map and interact with geo spatial information interfacing ArcGIS systems & open data maps.
- **Mozilla Summit - 2013:** Presented a lightning talk on the future of localization releases of Firefox with machine learning from existing translation data.

POSITIONS OF RESPONSIBILITY, SERVICE & VOLUNTEERING

- **Reviewer:** ACM WebConf (WWW) - 2024
- **Reviewer:** Nature Scientific Reports - 2023
- **Reviewer:** Workshop on Computing within Limits - 2023
- **Prospective Student Committee - Chair:** UW CSE Ph.D. Visit Days (2022-2023)
- **Student Chair - Networking & Wireless Systems:** UW CSE Graduate Admissions (2022-2023)
- **Student Volunteer Chair:** ACM Computing and Sustainable Societies (COMPASS'22)
- **Diversity Recruiting:** Meyerhoff Scholars Virtual Connections '21, Georgia Tech Graduate School Showcase '21
- **Co-Organizer:** CSE 590F - Computing and the Developing World Seminar
- **Reviewer:** ACM SIGCHI Late Breaking Work 2022
- **Prospective Student Committee - Chair:** UW CSE Ph.D. Visit Days (2021-2022)
- **Artifact Evaluation Committee:**
 - **2024:** OSDI'24, ATC'24
 - **2023:** SOSP'23, OSDI'23, ATC'23, Usenix Security'23
 - **2022:** SIGCOMM'22, EuroSys'22
 - **2021:** SOSP'21
- **Student Chair - Networking & Wireless Systems:** UW CSE Graduate Admissions (2021-2022)
- **Prospective Student Committee - ICTD Area Chair:** UW CSE Ph.D. Visit Days (2020-2021)
- **Student Chair - Networking & Wireless Systems:** UW CSE Graduate Admissions (2020-2021)
- **Reviewer:** ACM Digital Threats: Research and Practice (DTRAP) 2020
- **EuroSys 2021:** Extended Review Committee - Shadow PC
- **Volunteer Reviewer - Pre Application Review Service (PARS):** Statement Review and feedback for underrepresented graduate school applicants
- **Mentor - Google Code In & Google Summer of Code - 2017:** As a mentor for Google Code In, a contest for students between the ages of 13-17, I was responsible for guiding the students to make their first open source contributions. As a mentor for Google Summer of Code 2017, I mentored 19 students to build and enhance the loklak and Susi.AI projects.

- **Secretary - Student chapter - Association of Computing Machinery:** As the secretary for the student chapter of ACM, I was responsible for the development of a research culture and improving the research culture at National Institute of Technology, Warangal. Additionally, I organized workshops in different areas of computer science and competitive programming.
- **Lead - Web & Software Development Cell (WSDC):** As the lead of the WSDC cell of the institute, I've been responsible for leading my team to build inhouse products like Stark - our university CMS platform & a secure MIS system that handles the student and faculty information along with the room allotment procedures.
- **Mozilla Reps:** As a representative for Mozilla in India, I was responsible for collaborating with and mentoring new contributors, finding out their expertise and help them get started to open source contributions. I was also responsible for interacting with community members from across the world and taking combined decisions with the community.

MENTORSHIP

- **Abhishek Shah:** Secure and Private Promotional and Transactional SMS Messaging. → Okta → Meta
- **Akhila Narayanan:** End-to-End Encrypted Interoperable Messaging. → Grafana Labs → Arista Networks
- **Akshay Nayak:** Auditability and Anti-Bribery Enforcements (Supported by Bureau of Police Research and Development, Winner of Govt. of India Smart India Hackathon 2021). → Mastercard → George Washington University
- **Darren Denq:** Measuring ISP Monopolies and Service Fairness → Qualtrics
- **Donna X. Albee:** Key Establishment and E2EE Messaging in Decentralized Cellular Networks → Google
- **Evan Lam:** Quantifying Global Internet Health through Security and Resilience Measurements. → The Aerospace Corporation
- **Frankie O'Rourke:** Community Based Congestion Management (Primary mentor: Matthew Johnson) → DocuSign
- **Kapil Rathod:** Auditability and Anti-Bribery Enforcements (Supported by Bureau of Police Research and Development, Winner of Govt. of India Smart India Hackathon 2021). → Deutsche Bank → Penn State University
- **Mark Theeranantachai:** Securing Wireless Measurement Reporting (Co mentor: Esther Jang) → Ph.D student at UCLA
- **Pruthvi Taranath:** Auditability and Anti-Bribery Enforcements (Supported by Bureau of Police Research and Development, Winner of Govt. of India Smart India Hackathon 2021). → Deutsche Bank → New York University
- **Rachel Alwan:** Implications of alternative PKI usage in Web Browsers → Amazon
- **Rachel Ye:** Community Based Congestion Management (Primary mentor: Matthew Johnson) → Oracle
- **Todd Meng:** Measuring ISP Monopolies and Service Fairness. → WA NASA Space Grant Consortium
- **Zhennan Zhou:** Seattle Community Network Service Deployments (Primary mentor: Esther Jang) → F5 Networks

SKILLS

- **Technical:** C++, Go, Rust, Python, C, Java, Ruby, Scala, Perl, Javascript, OCaml, PHP, C#
- **Languages:** English, Hindi, Telugu, Arabic, French, Spanish
